Question: What happens when two tectonic plates?

1. **Collision** - Boundaries where two plates move towards each other. When the two plates meet, they can move together or apart. This is called a **collision**. When the plates move together, they can move together or apart.

How would you describe the motion of plates in a collision zone?

The plates are colliding together and creating the land to move up - this is a mountain range.

2. **Sliding** - One plate moves along the plate boundary without any other movement. This is called a **sliding** - which way the plate moves.
