Policy for Open and Distance Learning H. D. Perraton, Helen Lentell, 2004 This book considers the questions that planners and policy makers in open and distance learning need to address at any level of education

Resource Conflict and Environmental Relations in Africa Kelechi Johnmary Ani, 2023-03-15 The book discusses the failure of many African governments in providing the social needs of the masses thereby placing the citizenry on the desperate quest for economic resources Unfortunately in many African States mineral resources are owned explored and marketed by the machinery of the state The problem arises when the masses begin to challenge state access and ownership of resources that are domiciled within their ancestral land communities and constituencies Often the challenge and resistance to state ownership of resources is generated by communal or group sense of exploitation negligence and widespread poverty in the face of high resource endowment and waste by the government officials Paradoxically in Niger Delta of Nigeria as discussed in the book the state has unleashed unlimited might upon all social groups and agitators thereby leading to the increased act of taking arms by such groups When the informal resource agitators succeed in arming themselves they begin to demand social and environmental justice thereby leading to mass armed conflict between them and the government security agencies Sometimes the confrontation could be between them and other rival local resource actors in the informal sector of their country's economy bearing in mind that the resources within their jurisdiction have become the central determinant of national commonwealth It is at that state of desperado to control access extraction and sale of natural resources in a State by different armed groups that the process of natural resources extraction qualifies as the most visible cause of conflicts and crises around the African continent that is the centrepiece of the book This is quite understandable given that mineral resource is a gift of nature and nature is that phenomenon that every human group and nation claim to represent or believe to represent them

Police-Citizen Relations Across the World Dietrich Oberwittler, Sebastian Roché, 2017-10-02 Police citizen relations are in the public spotlight following outbursts of anger and violence Such clashes often happen as a response to fatal police shootings racial or ethnic discrimination or the mishandling of mass protests But even in such cases citizens assessment of the police differs considerably across social groups This raises the question of the sources and impediments of citizens trust and support for police Why are police citizen relations much better in some countries than in others Are police minority relations doomed to be strained And which police practices and policing policies generate trust and legitimacy Research on police legitimacy has been centred on US experiences and relied on procedural justice as the main theoretical approach This book questions whether this approach is suitable and sufficient to understand public attitudes towards the police across different countries and regions of the world This volume shows that the impact of macro level conditions of societal cleavages and of state and political institutions on police citizen relations has too often been neglected in contemporary research Building on empirical studies from around the world as well as cross national comparisons this volume considerably expands current perspectives on the sources of police legitimacy and citizens trust in the police Combining the analysis of micro level interactions with a perspective on the contextual framework and varying national conditions the contributions to this book illustrate the strength of a broadened perspective and lead us to ask how specific national frameworks shape the experiences of policing
