PLACE VALUE (4.NBT.1)

A multi-digit number is a number with more than one digit. A digit in one place represents 10 times as much as it represents in the place to its right.

millions			thousands			ones		
hundred millions	ten millions	millions	hundred thousands	ten thousands	thousands	hundreds	tens	ones
8	4	5	6	0	3	1	7	9

EX: 3 thousands = $3 \times (10 \times 10 \times 10) = 3,000$
5 hundred thousands = $5 \times 100,000 = 500,000$

A number is written in **standard form** when digits are used to show the place values.

EX: three hundred twenty-six thousand, one hundred twelve = 326,112

A number is written in **expanded form** when it is shown as the sum of the values of each digit.

EX: 8,597,870 = $8,000,000 + 500,000 + 90,000 + 7,000 + 800 + 70$

You Can Do This!

Bryan has \$35 in his savings account. If Bryan will have one hundred times as much in his account at the end of the year, how much will be in the account?
 $\$35 \times 100 = \$35 \times (10 \times 10) = \$3,500$
At the end of the year, Bryan will have \$3,500 in his account.

COMPARING NUMBERS (4.NBT.2)

You can compare two multi-digit numbers by looking at the values of the digits in each place.

EX: Compare using $<$, $>$, or $=$.
one hundred five 5 one hundred fourteen
105 5 114
105 5 114

Tip!

In this example, the hundreds digits are the same, so compare the tens digits: $0 < 1$.

ROUNDING NUMBERS (4.NBT.2, 4.NBT.3)

Use rules when you need to round to a certain place value.

EX: Round 56,489 to the nearest ten thousand.

- Find the two values the number can be rounded to based on place value: 50,000 or 60,000.
- Find the halfway point: 55,000.
- Decide if the number is less than or greater than the halfway point: $56,489 > 55,000$.
- If the number you are rounding is less than the halfway point, round down. If the number you are rounding is greater than the halfway point, round up.
So, 56,489 rounded to the nearest ten thousand is 60,000.

You Can Do This!

People donated \$73,908 to a charity last year to help rebuild a coral reef. To the nearest thousand, how much money did people donate?
To round 73,908 to the nearest thousand, look at the digit in the hundreds place. It is 9. Round up.
Last year, people donated about \$74,000.

FACTORS & MULTIPLES (4.OA.A)

Factors are parts of a number that multiply together to form a larger number.

EX: Find the factors of 12.
 $1 \times 12 = 12$, $2 \times 6 = 12$, and $3 \times 4 = 12$.
So, 1, 2, 3, 4, 6, and 12 are factors of 12.

Multiples of a number are found when the number is multiplied by a whole number.

EX: Find four multiples of 3.
 $1 \times 3 = 3$, $2 \times 3 = 6$, $3 \times 3 = 9$, and $3 \times 4 = 12$.
So, 3, 6, 9, and 12 are four multiples of 3.

PRIME & COMPOSITE NUMBERS (4.OA.B)

A **prime number** has factors of only 1 and itself.

Numbers that are not prime are **composite numbers**.

EX: Determine if the numbers 27, 19, and 2 are prime or composite.

Number	Factors	Prime or Composite?
27	$1 \times 27 = 27$ $3 \times 9 = 27$	composite
19	$1 \times 19 = 19$	prime
2	$1 \times 2 = 2$	prime

The Testing Charade Daniel Koretz, 2017-08-31 For decades we ve been studying experimenting with and wrangling over different approaches to improving public education and there s still little consensus on what works and what to do The one thing people seem to agree on however is that schools need to be held accountable we need to know whether what they re doing is actually working But what does that mean in practice High stakes tests Lots of them And that has become a major problem Daniel Koretz one of the nation s foremost experts on educational testing argues in *The Testing Charade* that the whole idea of test based accountability has failed it has increasingly become an end in itself harming students and corrupting the very ideals of teaching In this powerful polemic built on unimpeachable evidence and rooted in decades of experience with educational testing Koretz calls out high stakes testing as a sham a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement Rather than setting up incentives to divert instructional time to pointless test prep he argues we need to measure what matters and measure it in multiple ways not just via standardized tests Right now we re lying to ourselves about whether our children are learning And the longer we accept that lie the more damage we do It s time to end our blind reliance on high

stakes tests With *The Testing Charade* Daniel Koretz insists that we face the facts and change course and he gives us a blueprint for doing better

Testing for Learning Ruth Mitchell, 1992 Evaluation sends a message It points to what is valued and ignores what is not perceived to be important Educational evaluation testing and assessment has been telling students teachers administrators and legislators that the system values rote memorization and passive recognition of single correct answers

Thinking and Acting Systemically Alan Daly, Kara Finnigan, 2016-05-19 This volume argues that districts are important as a lever for change given the limited success of school by school efforts Policies that focus on skill development recognize and support performance create opportunities for collaboration build leader capacity and create networks of knowledge sharing hold great potential for improving districts but it will require a paradigm shift in the way we view our public school system and those who work within it away from blame and toward complex systems change

Whole Child, Whole School Eileen Santiago, JoAnne Ferrara, Jane Quinn, 2012-10-23 This book provides a unique examination on the ways in which educating the whole child in the community school serves to ameliorate the conditions of poverty and obstacles to learning faced by students Using a case study approach the book will highlight the successful journey of one school that transformed itself into a community school Given the rise in poverty nation wide and the unprecedented economic crisis many school districts are looking for innovative ways to garner resources for their schools The strategies outlined in this book will provide suggestions for using the resources of community partnerships as a framework for school renewal and improvement in student achievement The authors share their first hand experiences building a community school from the ground up as well as providing the national perspective on community schools Acknowledging the power of the community school this book concludes with a call to action for the dissemination of this model and its embrace of whole child education
