INTEGRATED CONTENT

DANCE + MATH

STRAND

CREATE

DRIVING QUESTION

How can the principle of symmetry influence the creation of an original piece of choreography?

PROJECT LESSON IDEA

Students will work collaboratively to create a dance that effectively demonstrates symmetry, in both locomotor and non-locomotor movements, as individuals, pairs, groups and in forms.

MEDIA ARTS + MATH

STRAND

PRODUCE

DRIVING QUESTION

How can presenting or sharing media artworks in a public format help a media artist learn and grow?

PROJECT LESSON IDEA

Create a media project to accompany a piece of art which incorporate geometric concepts (i.e., Mondrian perimeter vs. area). Record an artist statement, explaining the mathematical process and use the ShowMe app to create a digital display of their creation.

INTEGRATED CONTENT

MUSIC + ELA

STRAND

RESPOND

DRIVING QUESTION

How can we interpret the intent of a piece of music?

PROJECT LESSON IDEA

Engage students in a guided listening experience. Have them write a monologue as a "character" from the piece (the composer, the performer, an instrument, etc.). Present the monologue to a small group, and journal about the choices they made in their creation.

INTEGRATED CONTENT

THEATER + SCIENCE

STRAND

CONNECT

DRIVING QUESTION

We usually see theatre represent stories related to people, times, and places. How can theatre be used to communicate a story related to a science-related topic?

PROJECT LESSON IDEA

Students research plays and stories related to topics in the sciences. Have students collaboratively choose a topic or assign topics related to a scientific unit of study, and have groups create scripts that tell a story related to that unit of study.

INTEGRATED CONTENT

VISUAL ART + SOCIAL STUDIES

STRAND

PRESENT

DRIVING QUESTION

What criteria are considered when selecting work for presentation, a portfolio or a collection?

PROJECT LESSON IDEA

Students curate artifacts related to a social studies topic. Include music, visual art, videos, digital media, information about important individuals from the time/culture, and cultural/historical items in their exhibit. Artifacts should be catalogued and given museum tags, and students should be able to act as a docent to visitors.

Idea-Based Learning Edmund J. Hansen, 2023-07-03 Synthesizing the best current thinking about learning course design and promoting student achievement this is a guide to developing college instruction that has clear purpose is well integrated into the curriculum and improves student learning in predictable and measurable ways The process involves developing a transparent course blueprint focused on a limited number of key concepts and ideas related tasks and corresponding performance criteria as well as on frequent practice opportunities and early identification of potential learning barriers Idea based Learning takes as its point of departure the big conceptual ideas of a discipline that give structure and unity to a course and even to the curriculum as opposed to a focus on content that can lead to teaching sequences of loosely related topics and aligns with notions of student centered and outcomes based learning environments Adopting a backwards design model it begins with three parallel processes first identifying the material that is crucial for conceptual understanding second articulating a clear rationale for how to choose learning outcomes based on student needs and intellectual readiness and finally aligning the learning outcomes with the instructional requirements of the authentic performance tasks The resulting syllabi ensure cohesion between sections of the same course as well as between courses within a whole curriculum assuring the progressive development of students skills and knowledge Key elements of IBL include Helping students see the big picture Building courses around one or more authentic performance tasks that illuminate the core concepts of the discipline Clearly identifying performance criteria for all tasks Incorporating practice in the competencies that are deemed important for students success By placing the onus of learning on the student liberating faculty to take on the role of learning coaches Designing tasks that help students unlearn simplistic ideas and replace them with improved understandings Edmund Hansen expertly guides the reader through the steps of the process providing examples along the way and concluding with a sample course design document and syllabus that illustrate the principles he propounds

Teaching Science and Investigating Environmental Issues with Geospatial Technology James MaKinster, Nancy Trautmann, Michael Barnett, 2013-11-05 The emerging field of using geospatial technology to teach science and environmental education presents an excellent opportunity to discover the ways in which educators use research grounded pedagogical commitments in combination with their practical experiences to design and implement effective teacher professional development projects Often missing from the literature are in depth explicit discussions of why and how educators choose to provide certain experiences and resources for the teachers with whom they work and the resulting outcomes The first half of this book will enable science and environmental educators to share the nature and structure of large scale professional development

projects while discussing the theoretical commitments that undergird their work Many chapters will include temporal aspects that present the ways in which projects change over time in response to evaluative research and practical experience In the second half of the book faculty and others whose focus is on national and international scales will share the ways in which they are working to meet the growing needs of teachers across the globe to incorporate geospatial technology into their science teaching These efforts reflect the ongoing conversations in science education geography and the geospatial industry in ways that embody the opportunities and challenges inherent to this field This edited book will serve to define the field of teacher professional development for teaching science using geospatial technology As such it will identify short term and long term objectives for science environmental and geography educators involved in these efforts As a result this book will provide a framework for future projects and research in this exciting and growing field
