

HOME SWIMMING POOL SAFETY CHECKLIST

This checklist does not substitute for a pool inspection and is for educational purposes only. Pool owners should consider getting a professional assessment of their pool's compliance.

Adult supervision, in combination with compliant pool safety fencing, is the most effective method of preventing a child from drowning.

Please check, fix and maintain your pool and safety barrier on a regular basis.

Pool barrier requirements apply to spa pools indoor, outdoor, in ground, aboveground and other portable pools capable of being filled with water to a depth of 300mm or more.

SWIMMING POOL FENCE

❖ **Must be secure and in good working order**

❖ **Must be at least 1.2m high**

Is there a pool fence or other child-resistant barrier separating the pool from your house and adjoining properties and public spaces at all times?	☐ Yes	☐ No – Install compliant pool fencing.
Is the outside of the pool fence at least 1200mm high all the way around when measured from ground level?	☐ Yes	☐ No – Remove vegetation from around the fence line or raise the pool fence until there is a continual height of at least 1200mm achieved.
If a boundary fence forms part of the pool barrier, and your pool was built after 2006, is the boundary fence at least 1800mm high?	☐ Yes	☐ No – Install 1.8m high fencing to those sections of the boundary fence that form part of the pool safety barrier.
Is the gap between the bottom of the fence and the ground less than 100mm?	☐ Yes	☐ No – Reduce the gap by either attaching additional material to the bottom of the fence or concreting rocks, bricks etc. into the ground beneath the fence.
Are all vertical rails on the fence less than 100mm apart?	☐ Yes	☐ No – Either reposition the vertical rails or install additional rails so that gaps between the rails are no greater than 100mm.
If you have a timber pool fence and the vertical rails are more than 10mm apart, is there a distance of at least 900mm between the top and bottom horizontal rails?	☐ Yes	☐ No – Install an additional horizontal rail along the top horizontal rail so that there is 900mm between the upper surfaces of the bottom and top horizontal rails.
Is the distance between any potential handholds and footholds on the pool fence and its associated space at least 900mm apart to inhibit a young child from climbing over it?	☐ Yes	☐ No – Either remove the potential handholds and footholds or shield them using any durable non-climbable material, such as acrylic or polycarbonate sheeting or aviary wire that has holes no greater than 13mm.
