Congratulations on your choice of a Nikon Crossbow Scope. Your new scope is the finest example of Nikon's rugged and durable construction and precision bright optics, important qualities for a serious crossbow shooter's scope.

Whether you use your scope for hunting or for target shooting, the procedure for mounting is identical. You should acquire a set of high quality mounting rings which have a standard diameter of 25.4 mm (1 inch). Follow the ring manufacturer's instructions for mounting procedures. After mounting the scope on your crossbow, follow the procedures for reticle alignment.

Caution

(1) Do NOT look at the sun through the crossbow scope. It will permanently damage your eye. This precaution applies to all optical devices such as cameras and binoculars.

(2) Do NOT mount on any firearms since this is a crossbow scope.

(3) The crossbow scope is effectively sealed against moisture and dust. You may use your scope safely either in the rain or in dusty climates. To preserve the appearance of the scope, we suggest that it be dried and cleaned prior to storage. Use a soft cloth for cleaning metal surfaces and use photographic lens tissue to clean the scope's lenses.

When setting the reticle for hunting, you should determine your standard range and then adjust the reticle based upon that target distance. For targets which vary from the standard distance you may simply adjust the position of the reticle in relation to your target, or you may wish to use the procedure for trajectory compensation. You can also go to www.nikonhunting.com to compare, graph and enhance your reticle settings. It's up to your personal preference.

We hope that you will enjoy your new Nikon crossbow scope for many years to come. Enjoy using it, and above all, always follow safe shooting procedures!

Instruction manual/Mode d'emploi

3. Instructions

(1) Focusing

- ① Look through the eyepiece with your eye positioned about 3 - 4 in. (7.5 - 10cm) away from the eyepiece lens, and you will see the BDC 60-reticle.
- ② Be sure your eye is positioned within proper alignment and proper eye relief otherwise the view will "black out."
- ③ Point the objective end of the scope at the sky (Do not point at the sun) or at a plain unpatterned wall.
- ④ Turn the eyepiece adjustment counter-clockwise and then turn it clockwise until the reticle appears sharp.

(2) Adjustment of the crossbow scope

Sighting through the crossbow scope, align the crossbow with your aiming point on the target and shoot a trial bolt. If the bolt does not hit the aiming point, adjust the elevation and windage, as follows:

- If the bolt hits under the aiming point, turn the elevation adjustment (counter-clockwise) in the direction of the arrow marked "U" for up.
- If the bolt hits high, turn adjustment (clockwise) in the direction of the arrow marked "D" for down.
- If the bolt hits to the right of the aiming point, turn the windage adjustment (clockwise) in the direction of the arrow marked "L" for left. If the bolt hits to the left of the aiming point, turn adjustment (counter-clockwise) in the direction of the arrow marked "R" for right.
- After the reticle has been adjusted to the point of impact, replace adjustment cap both the windage and elevation turnts.

(3) Zero setting of scale grip

The adjustment ring has a pop-up adjusting system. After the reticle has been adjusted to the point of impact, for zero setting pull out the adjusting ring. The adjusting ring can turn freely now, and align the zero number to index line, then release the ring. It automatically retracts to the original position.

Waterproof Specification:

The crossbow scope is waterproof, and will suffer no damage to the optical system if submerged or dropped in water to a maximum depth of 1 meter for up to 10 minutes.

The crossbow scope offers the following advantages:

- Can be used in conditions of high humidity, dust and rain without risk of damage.
- Nitrogen-filled design makes it resistant to condensation and mold.

Observe the following when using the crossbow scope.

- It should not be operated nor held in running water.
- Any moisture should be wiped off before adjusting movable parts (Adjustment knob, eyepiece, etc.) of the crossbow scope to prevent damage and for safety reasons.

To keep your crossbow scope in excellent condition, Nikon Vision recommends regular servicing by an authorized dealer.

Note:

- The windage and elevation scales of the Bolt XR 3x32 are calibrated to move the point of impact 14 inch per click at 20 yards.

Maintenance

(1) Lens cleaning

To remove dirt or fingerprint, soak gauze or lens cleaning paper (silicon-free paper sold at camera shop) with a small quantity of absolute alcohol (available from drugstore) and lightly wipe off. Wiping with leather chamois is not recommended as it is likely to damage the lens surface.

Dust may scratch the lens surface or corrode the lens.

Brush dust off using a soft oil-free brush.

(2) Scope Exterior

Use a soft dry cloth to wipe off any dirt or fingerprints that might accumulate.

It is not necessary to oil the scope's surface.

(3) Windage/Elevation Adjustments

These adjustments are permanently lubricated. Do not attempt to lubricate them. Cover with caps supplied, except when adjusting, to keep out dust and dirt.

(4) Eyepiece Adjustment

This adjustment is permanently lubricated. Do not attempt to lubricate.
