

Periodic Table Basics

Step 1: Complete the squares for each element by adding the atomic number, name, and atomic mass.

Write the atomic number at the top of the square.

Write the element's name under the symbol.

Write the atomic mass at the bottom of the square.

Step 2: Determine the number of protons, neutrons, and electrons in each element.

Step 3: Create a Bohr diagram for each element.

Step 4: Draw the Lewis Structure for each element.

The sample card for Boron (B) is shown within a large rectangular frame. Inside the frame, there is a smaller square representing the element's card. This square contains the atomic number '5' at the top, the symbol 'B' in the middle, and the name 'Boron' below it. At the bottom of this square is the atomic mass '10.81'. To the right of the square, there are three lines for data: 'P = 5', 'N = 6', and 'E = 5'. Below these lines is a Bohr Diagram for Boron, showing a nucleus with 5 protons and 5 neutrons, and three electron shells with 2, 2, and 1 electron respectively. At the bottom right is the Lewis structure for Boron, showing the symbol 'B' with three single bonds (represented by pairs of dots) extending from it. Arrows point from the text instructions on the left to the corresponding parts of the sample card.

Step 5: Use the following colors to shade in the square for each element. You should ONLY color in the small square in the upper left-hand corner and not the entire card.

Green = Li & Na

Pink = O & S

Blue = Be & Mg

Purple = F & Cl

Orange = B & Al

Red = C & Si

Tan = N & P

Yellow = He, Ne, & Ar

Step 6: Cut the cards apart and arrange according to atomic number in the pattern shown below. Once you have the cards arranged in the correct order, glue them to a large sheet of construction paper.

Step 7: Answer the questions on the back of this worksheet using the information on your Periodic Table.
