Dorel Banabic,2023-12-18 This volume showcases the valuable achievements of the Romanian technology and industry
worldwide It started from the premise that the history of Romanian technique is scarcely known outside the borders of
Romania The main Romanian contributions to the world s technological heritage are missing except for a few names in the
field of aviation from the great encyclopedias and dictionaries published worldwide This is due among other reasons to the
insufficient promotion in widely spoken languages of the history of Romanian technology The multidisciplinary approach of
the volumes means that the field of technology had to be split into several branches The present volume includes the
following industries mining metallurgy oil natural gas machine building agricultural machinery military textiles and
construction Folk technology the formation of the industrial system and mechanics are tackled in separate chapters For each
field are engaged the collaboration of authors who have already published a history of their field Certain chapters were
drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for
Romania and who are familiar not only with the facts and the history of their field but also with the philosophy behind its
development The Journal of Education ,1927 The Eighteenth Century ,1974 *The Literary World* ,1889 **The
