Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal

institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system

**Collecting and Interpreting Qualitative Materials** Norman K. **integrated learning: explicating a mathematical concept in inquiry-based science camps** Louise Bindel, 2018

Although various arguments for integrated learning of mathematics and science exist empirical evidence that integrated learning is as beneficial as anticipated is limited Therefore this quasi experimental study investigates the effect of integrated learning of mathematics and science on eight student variables by comparing it to a control group Results show that integrated learning is no miracle cure but has positive and negative effects on specific student outcomes Whereas integrated learning effects students view of the relation between mathematics and science positively it effects students scientific self concept negatively Thus integrated learning should not substitute but rather complement disciplinary learning Obwohl zahlreiche Argumente für das integrierte Lernen von Mathematik und Naturwissenschaften existieren ist die vorteilhafte Wirkung integrierten Lernens begrenzt empirisch belegt Im Rahmen dieser quasi experimentellen Studie wird der Effekt integrierten Lernens auf acht Sch lervariablen durch Vergleiche mit einer Kontrollgruppe untersucht Die Ergebnisse zeigen dass integriertes Lernen kein Allheilmittel ist sondern positive und negative Effekte auf bestimmte Sch lervariablen hat Während integriertes Lernen die Sicht der Sch lerinnen und Sch ler auf die Beziehung zwischen Mathematik und Naturwissenschaften positiv beeinflusst hat es einen negativen Effekt auf das naturwissenschaftliche Selbstkonzept Daher sollte integriertes Lernen nicht stellvertretend sondern ergänzend zu disziplin rem Lernen implementiert werden      **The**
