Engineering of Microorganisms for the Production of Chemicals and Biofuels from Renewable Resources Guillermo Gosset, 2017-01-26 This book reviews state of the art regarding strategies for generating and improving microbial strains designed for utilizing renewable raw materials It discusses methods for genetically engineering of thermophilic bacteria *Saccharomyces cerevisiae* *Escherichia coli* and *Zymomonas mobilis* as well as approaches for obtaining useful products from these renewable raw materials based on biotechnological processes using microbes to chemically transform them However the efficient transformation of lignocellulosic biomass or glycerol to useful products represents a major challenge Biomass has to be treated physically and chemically to release a mixture of sugars that potentially can be employed by the microbial production strains These hydrolytic treatments result in diverse toxic compounds being generated and released that negatively impact strain performance Furthermore most of the commonly used industrial microbes do not have the natural capacity to efficiently utilize and transform the generated sugar mixtures or glycerol The microbial species reviewed in this book possess particular advantages as production strains and are currently

employed for the synthesis of numerous biofuels and chemicals The book reviews the general and strain specific genetic engineering strategies for the improvement of sugar mixtures and glycerol catabolism The issue of lignocellulosic hydrolysate toxicity is addressed in several chapters where genetic engineering and adaptive laboratory evolution strategies are reviewed and discussed The objective of this book is to provide the current knowledge regarding strategies for the generation and improvement of microbial strains designed for the transformation of renewable raw materials into useful products This book aims to become a reference for researchers and students working in this field *Augmented Reality and Virtual Reality* M. today s bestselling behavioral science and argues that the trendy TED Talk friendly psychological interventions that are so in
vogue at the moment will never be enough to truly address social injustice and inequality With their viral TED talks
bestselling books and counter intuitive remedies for complicated problems psychologists and other social scientists have

become the reigning thinkers of our time Grit and power posing promised to help overcome entrenched inequalities in schools and the workplace the Army spent hundreds of millions of dollars on a positive psychology intervention geared at preventing PTSD in its combat soldiers and the implicit association test swept the nation on the strength of the claim that it can reveal unconscious biases and reduce racism in police departments and human resources departments But what if much of the science underlying these blockbuster ideas is dubious or fallacious What if Americans longstanding preference for simplistic self help platitudes is exerting a pernicious influence on the way behavioral science is communicated and even funded leading respected academics and the media astray In The Quick Fix Jesse Singal examines the most influential ideas of recent decades and the shaky science that supports them He begins with the California legislator who introduced self esteem into classrooms around the country in the 1980s and the Princeton political scientist who warned of an epidemic of youthful superpredators in the 1990s In both cases a much touted idea had little basis in reality but had a massive impact Turning toward the explosive popularity of 21st century social psychology Singal examines the misleading appeal of entertaining lab results and critiques the idea that subtle unconscious cues shape our behavior As he shows today s popular behavioral science emphasizes repairing improving and optimizing individuals rather than truly understanding and confronting the larger structural forces that drive social ills Like Anand Giridharadas s Winners Take All The Quick Fix is a fresh and powerful indictment of the thought leaders and influencers who cut corners as they sell the public half baked solutions to problems that deserve more serious treatment
