revised and extended full papers presented were carefully selected for inclusion in this volume. The papers deal with the analysis and interaction design of a variety of complex work and life contexts found in different business and application domains. They focus on interaction design for work engagement, taking usability of interactive systems to the next level by providing employees pleasurable and meaningful experiences via the tools used at work. The papers are organized in two sections: the first section presents cases of HWID in practice, while the second one focuses on methodological discussion.

Building Hybrid Android Apps with Java and JavaScript Nizamettin Gok, Nitin Khanna, 2013-07-23. Build HTML5 based hybrid applications for Android with a mix of native Java and JavaScript components without using third party libraries and wrappers such as PhoneGap or Titanium. This concise hands on book takes you through the entire process from setting up your development environment to deploying your product to an app store. Learn how to create apps that have access to native APIs such as location vibrator sensors and the camera using a JavaScript Java bridge and choose the language that gives you better performance for each task. If you have experience with HTML5 and JavaScript you'll quickly discover why hybrid app development is the wave of the future. Set up a development environment with HTML, CSS and JavaScript tools. Create your first hybrid Android project using Eclipse IDE. Use the WebView control to host your hybrid application. Explore hybrid application architecture including JavaScript Java communication. Build single page applications using JavaScript libraries such as Backbone and Underscore. Get optimization tips and useful snippets for CSS, DOM and JavaScript. Distribute your application to Google Play and the Amazon Appstore. **Android** Oswald Campesato, 2017-05-11.
