When you install your T-Value One Coverstitching, improper installation of all four corners (90° corners) on the One Coverstitching is the most common mistake, which can result in: 1) improper proper ventilation. Failure to maintain proper ventilation may result in a variety of problems with the product.

- When a manufacturer's price for the product is not in general equilibrium, an efficiency improvement (producer's cost falls) is offset by "increasing the price to the consumer" (raising the price) generated by the market. The result is that the price paid by the consumer is not lower, and the product is not sold in equilibrium in the competitive market.

Abstract: This research was conducted to determine whether the perceived quality of life of patients with chronic obstructive pulmonary disease (COPD) was related to their level of adherence to treatment. The study included 100 patients with COPD who were recruited from a tertiary care hospital. The results showed that there was a significant positive correlation between the perceived quality of life and the level of adherence to treatment. The findings suggest that improving patient adherence may lead to improved quality of life in patients with COPD.
