Rooted The Story Of Cvc:

Rooted Blake Hiemstra, 2015-01-03 *Rooted* tells the story of the birth and growth of Central Valley Christian School. The book details its remarkable history from the humble beginning with a crew of 4 brave teachers and 64 pioneering students who met for three years in the cramped conditions of a local church all the way to the sprawling modern day campus that now houses the school. *Rooted* traces the teachers, students and parents who stepped out in faith and the loving God who wrote the CVC story on the pages of their lives.

A Dictionary of Austronesian Monosyllabic Roots (Submorphemes)

Robert Blust, 2022-06-06 This book documents an understudied phenomenon in Austronesian languages namely the existence of recurrent submorphemic sound meaning associations of the general form CVC. It fills a critical gap in scholarship on these languages by bringing together a large body of data in one place and by discussing some of the theoretical issues that arise in analyzing this data. Following an introduction which presents the topic it includes a critical review of the relevant literature over the past century and discussions of the following: 1 problems in finding the root the needle in the haystack problem 2 root ambiguity 3 controls on chance as an interfering factor 4 unrecognized morphology as a possible factor in duplicating evidence 5 the shape structure of the root 6 referents of roots 7 the origin of roots 8 the problem of distinguishing false cognates produced by convergence in root bearing morphemes from legitimate comparisons resulting from divergent descent and 9 the problem of explaining how submorphemes are transmitted across generations of speakers independently of the morphemes that host them. The remainder of the book consists of a list of sources for the 197 languages from which data is drawn followed by the roots with supporting evidence a short appendix and references.

A Grammar of Semelai

Nicole Kruspe, 2004-04-08 Semelai is a previously undescribed and endangered Aslian Mon Khmer language of the Malay Peninsula. This book the first in depth description of an Aslian language provides a comprehensive reference grammar of Semelai. Semelai intertwines two types of morphological system a concatenative system of prefixes suffixes and a circumfix acquired through extended contact with Malay and a nonconcatenative system of prefixes and infixes including infix reduplication inherited from Mon Khmer. There are distinctive word classes Nouns Verbs and Expressives the latter iconic utterances which simultaneously provide information about the predicate and its arguments. Semelai has many derivational processes which change word class or affect transitivity and it combines both head marking and dependent marking profiles. It also has a rich phonemic system of 20 vowels and 32 consonants. Nicole Kruspe's discussion is complemented with a generous number of illustrative examples and texts creating a reference work that will be welcomed by descriptivists and typologists alike.

A Grammar of Nese Lana Grelyn Takau,2023-08-15 Nese is a dying Oceanic language spoken on the island of Malekula in northern Vanuatu This book based on first hand fieldwork data and without adhering to any particular syntactic framework presents a synchronic grammatical description of Nese s phonology and syntax Despite being on the verge of extinction with fewer than 20 living speakers the language displays intriguing properties including but not exclusive to the cross linguistically rare apicolabial phonemes interesting vowel raising patterns in some word classes and a discontinuous negation relationship that is obligatorily expressed with the irrealis mood marker This book will probably be the last work published on Nese
