Oeuvres De Victor Delbos:

Oeuvres de Victor Delbos Victor Delbos, 2012 The Cambridge Companion to Malebranche Steven Nadler, 2000-07-03
This Companion contains specially commissioned essays addressing Malebranche's thought comprehensively and systematically *The Breakdown of Cartesian Metaphysics* Richard A. Watson, 1998-01-01 Combines historical research and philosophical analysis to cast light on why and how Cartesianism failed as a complete metaphysical system Far more radical in its conclusions than his 1966 study *The Downfall of Cartesianism* a slightly revised version of which forms the main body of the current work Watson argues that Descartes's ontology is incoherent and vacuous his epistemology deceptive and his theology unorthodox indeed that Descartes knows nothing **The Downfall of Cartesianism 1673-1712** R. A. Watson, 2013-04-17 Phenomenalism idealism spiritualism and other contemporary philosophical movements originating in the reflective experience of the cogito witness to the immense influence of Descartes However Cartesianism as a complete metaphysical system in the image of that of the master collapsed early in the 18th century A small school of brilliant Cartesians almost all expert in the new mechanistic science flashed like meteors upon the intellectual world of late 17th century France to win well deserved recognition for Cartesianism They were accompanied by a scintillating comet Malebranche the deviant Cartesian now remembered as the orthodox Cartesians are not However all these bright lights faded upon the philosophical horizon almost as soon as they appeared The metaphysical dualism of Descartes was as such neither to be preserved nor reconstructed There are many reasons why the Cartesian system did not survive the victory over Scholasticism which Descartes Malebranche and the others had won Newtonian physics very soon replaced Cartesian physics The practical interest and success of the new science which the Cartesians themselves had nurtured drew men down from the lofty realms of metaphysics On the popular front Cartesianism was attacked and ridiculed for the view that animals are unthinking machines In the schools of Paris and elsewhere there was the general but severe opposition of pedants which is perhaps of more historical than philosophical interest *De la Recherche du Bien* A.G. Walton, 2013-12-17 **Heidegger and French Philosophy** Tom Rockmore, 2002-09-11 Martin Heidegger's impact on contemporary thought is important and controversial However in France the influence of this German philosopher is such that contemporary French thought cannot be properly understood without reference to Heidegger and his extraordinary influence Tom Rockmore examines the reception of Heidegger's thought in France He argues that in the period after the Second World War due to the peculiar nature of the humanist French Philosophical tradition Heidegger became the master thinker of French philosophy Perhaps most importantly he contends that this reception first as philosophical anthropology and later as postmetaphysical humanism is systematically mistaken *Oeuvres de Maine de Biran* Pierre Maine de Biran, 1924 *Politics and Philosophy in the Thought of Destutt de Tracy* Brian W. Head, 2019-11-21 First published in 1987 This study describes and analyses the published writings of the French philosopher Antoine Destutt de Tracy The author focuses on the three decades from the

calling of the *Etats généraux* to the early years of the Restoration the period of Tracy's entire literary production and the period of his greatest influence and reputation This title will be of great interest to students of history philosophy and politics

The Blondelian Synthesis John J. McNeill, 2022-07-18 *Foucault's Legacy* C.G. Prado, 2011-10-20 Foucault's Legacy brings together the work of eight Foucault specialists in an important collection of essays marking the 25th anniversary of Foucault's death Focusing on the importance of Foucault's most central ideas for present day philosophy the book shows how his influence goes beyond his own canonical tradition and linguistic milieu The essays in this book explore key areas of Foucault's thought by comparing aspects of his work with the thought of a number of major philosophers including Nietzsche Heidegger Rorty Hegel Searle Vattimo and Williams Crucially the book also considers the applicability of his central ideas to broader issues such as totalitarianism religion and self sacrifice Presenting a fresh and exciting vision of Foucault as a philosopher of enduring influence the book shows how important Foucault remains to philosophy today

The Metamorphoses of the City of God Etienne Gilson, Remi Brague, 2020-10-16 Etienne Gilson 1884-1978 was a French philosopher and historian of philosophy as well as a scholar of medieval philosophy In 1946 he attained the distinction of being elected an Immortal member of the Académie française He was nominated for the Nobel Prize in Literature in 1959 and 1964 The appearance of Gilson's *Metamorphosis of the City of God* which were originally delivered as lectures at the University of Louvain Belgium in the Spring of 1952 coincided with the first steps toward what would become the European Union The appearance of this English translation coincides with the upheaval of Brexit Gilson traces the various attempts of thinkers through the centuries to describe Europe's soul and delimit its parts The Scots Catalonians Flemings and probably others may nod in agreement in Gilson's observation on how odd would be a Europe composed of the political entities that existed two and a half centuries ago Those who think the European Union has lost its soul may not be comforted by the difficulty thinkers have had over the centuries in defining that soul Indeed the difficulties that have thus far prevented integrating Turkey into the EU confirm Gilson's description of the conundrum involved even in distinguishing Europe's material components And yet the endeavor has succeeded so that the problem of shared ideals remain inescapable One wonders which of the thinkers in the succession studied by Gilson might grasp assent and illuminate the EU's path

Teilhard de Chardin David Grumett, 2005 Pierre Teilhard de Chardin 1881-1955 has been regarded for too long as an esoteric thinker who evacuates theology by subjecting it to scientific theory There is an urgent need to reclaim him as a French catholic theologian with intellectual roots in the early twentieth century Teilhard's imaginative and inspiring work is grounded in the constructive use of biblical and patristic motifs and in his own life experiences of war exile and scientific endeavour From these he develops a distinctive philosophical theology which combines elements frequently assigned to the separate domains of philosophy of religion systematic theology and mysticism Teilhard provides a detailed theology of human embodiment and natural substances whilst his theories of human action passion vision and virtue offer suggestive resources

to pastoral theology His evolutionary cosmology and social democratic politics are discussed in their historical context and the significance of his work for the ongoing dialogue between science and religion is assessed The Life Sciences in Eighteenth-Century French Thought ,1998-03 Available for the first time in English Roger s masterwork of intellectual history situates the life sciences within the larger context of French Enlightenment thought and the history of institutions

The Enlightenment and the Intellectual Foundations of Modern Culture Louis Dupre,2008-10-01 The prestige of the Enlightenment has declined in recent years Many consider its thinking abstract its art and poetry uninspiring and the assertion that it introduced a new age of freedom and progress after centuries of darkness and superstition presumptuous In this book an eminent scholar of modern culture shows that the Enlightenment was a more complex phenomenon than most of its detractors and advocates assume It includes rationalist as well as antirationalist tendencies a critique of traditional morality and religion as well as an attempt to establish them on new foundations even the beginning of a moral renewal and a spiritual revival The Enlightenment s critique of tradition was a necessary consequence of the fundamental modern principle that we humans are solely responsible for the course of history Hence we can accept no belief no authority no institutions that are not in some way justified This foundation for better or for worse determined the course of the following centuries Despite contemporary reactions against it the Enlightenment continues to shape our own time and still distinguishes Western culture from any other
