

Chapter Four

The Author's Voice

C Characterisation & Setting — Crooks and his Room

This chapter is set in the harness room, 'a little shed that leaned off the wall of the barn', home to Crooks, 'the negro stable buck'. There is a detailed description of his room and its contents. Living in seclusion in a small, isolated room, Crooks lives a bitter and lonely life in the barn, which is a disheartening and foreboding place in the story.

1 Write a contents list for Crooks's room and say what each item tells us about him.

Items	What it tells us about Crooks
Long box filled with straw, on which his blankets were flung	Crooks is poor and has no money to buy proper bedding. He is not allowed to sleep in the main barn, so he has to sleep in the white work-shed. The straw box is the only furniture in the harness room, which is a dark, cold, and lonely place for Crooks to live.
Pegs on which hung broken harness in place of being mended	Crooks is a stable buck, and his job is to mend harness. The fact that the harness is broken and not mended suggests that Crooks is not well paid and has to make do with what he has.
A little bench for leather-working	Crooks is a skilled leather worker, and the bench is a simple, functional piece of furniture that he uses for his work.

2 Using the passage from Chapter 4 below, draw a realistic, accurate picture of Crooks's room. Why do you think Steinbeck has included a character like Crooks in the novel?

"Crooks had his apple box on his back, and in it a cage of medicine bottles, both for himself and for the horses. There were cans of saddle soap and a dippy can of tar with its paint brush sticking over the side. And scattered about the floor were a number of personal possessions, for, being alone, Crooks threw his things about, and being a stable buck and a cripple, he was more possessive than the other men, and he had accumulated more possessions than he could carry on his back.

Crooks possessed several pairs of shoes, a pair of rubber boots, a big alarm clock and a single-bottled shotgun. And he had books, too; a tattered dictionary and a mangled copy of the California civil code for 1905. There were tattered magazines and a few dirty books on a special shelf over his back. A pair of large gold-rimmed spectacles hung from a nail on the wall above his head. This room was messy and filthy next, for Crooks was a proud, self man." (Chapter 4, p. 75-76)

The Risk Theatre Model of Tragedy Edwin Wong,2019 WHEN YOU LEAST EXPECT IT BIRNAM WOOD COMES TO DUNSINANE HILL The Risk Theatre Model of Tragedy presents a profoundly original theory of drama that speaks to modern audiences living in an increasingly volatile world driven by artificial intelligence gene editing globalization and mutual assured destruction ideologies Tragedy according to risk theatre puts us face to face with the unexpected implications of our actions by simulating the profound impact of highly improbable events In this book classicist Edwin Wong shows how tragedy imitates reality heroes by taking inordinate risks trigger devastating low probability high consequence outcomes Such a theatre forces audiences to ask themselves a most timely question what happens when the perfect bet goes wrong Not only does Wong reinterpret classic tragedies from Aeschylus to O'Neill through the risk theatre lens he also invites dramatists to

create tomorrow's theatre As the world becomes increasingly unpredictable the most compelling dramas will be high stakes tragedies that dramatize the unintended consequences of today's risk takers who are taking us past the point of no return

A Theory of Distributed Number Myriam Dali,Eric Mathieu,2021-08-15 The objective of this book is to develop a deeper understanding of the form and interpretation of number Using insights from Generative syntax and Distributed Morphology we develop a theory of distributed number arguing that number can be associated with several functional heads and that these projections exist depending on the features they specify In doing so we make a strong claim for a close mapping between the syntactic structure and the semantics in the noun phrase since each node corresponds to a different interpretation of number Despite some technical implementations the book is accessible to linguists working outside any particular syntax semantic framework since we propose generalizations that are applicable in many if not all models of grammar The book focuses on Arabic but also discusses a number of languages including English French Ojibwe Blackfoot Hebrew Japanese Korean Chinese Turkish Persian and Western Armenian

Ourselfs Frank Smith,2013-05-13 This book delves into how we come to terms with ourselves with other people and with the world in general It is about how we come to be what we are and to think the way we do It is a book about influences on this process A particular influence to which Smith gives central consideration is language not just in terms of the communicative networks in which it engages us the information that presents itself to us but in the largely unsuspected framework for thought that lies within language itself He also considers deeply the role of technology This is a book of description not of explanations these are two quite different intellectual territories Smith writes about what can be observed not philosophized about Thus he does not discuss the inner workings of the human brain His claim is that what he is interested in thinking learning understanding remembering have never been found in the brain The aim is to describe the scope and limits for how we can be seen to think learn understand and remember but not to explain such behavior by

recourse to hypothetical inner entities. *Ourselves* speaks especially to educators. It outlines the possibilities and limitations inherent in all of us. It delineates who we are but also stresses that no two people are the same; that what we become depends on our journeys in life and the people we encounter on the way. The formal part of learning that is called education is particularly sensitive to the role of people who organize critical experiences for us: our teachers. The brief summaries at the end of each chapter reinforce and highlight points that are of particular relevance to teachers. Researchers, professionals, and graduate students across the fields of literacy education, psychology of reading, learning theory, human learning, educational psychology, and psycholinguistics will find this book compelling.

Citizen Steinbeck Robert McParland, 2016-09-29

John Steinbeck is one of the most popular and important writers in American literature. Novels such as *The Grapes of Wrath*, *Of Mice and Men*, and *East of Eden*, and the journal *Travels with Charley* convey the core of Steinbeck's work: fiction that is reflective and compassionate. The Nobel prize winner cared deeply about people, and his writing captured the spirit, determination, and willingness of individuals to fight for their rights and the rights of others. His art of caring is critical for today's readers and as a touchstone for our collective future. In *Citizen Steinbeck: Giving Voice to the People*, Robert McParland explains how the author's work helps readers engage in moral reflection and develop empathy. McParland also looks at the ways educators around the world have used Steinbeck's writings, both fiction and nonfiction, to impart ideals of compassion and social justice. These ideals are weaved into all of Steinbeck's work, including his journalism and theatrical productions. Drawing on these texts as well as interviews with secondary level teachers, this book shows how Steinbeck's work prompts readers to think critically and contextually about our values. Demonstrating the power a single author can have on generations of individuals around the world, *Citizen Steinbeck* enables readers to make sense of both the past and the present through the prism of this literary icon's inspirational work.

Genetic Analysis of the Cell Surface P.

Goodfellow, 2013-12-11 The cell surface is the barrier between the cell and its environment which regulates the flow of both simple and complex molecules into and out of the cell. It is also the organelle responsible for communication between the cell and its environment. Each cell expresses receptors for a wide variety of hormones, growth factors, growth substrates, and other cells. In multicellular organisms, communication between cells is required for controlling development, cellular differentiation, morphogenesis, and in a more general sense, integration of myriad cell types into a single organism. The series *Receptors and Recognition* has as its overall aim the dissection of the cell surface to correlate structure and function for this complex organelle. In most of the preceding volumes, the approach has been biochemical or physiological. In this volume, the mammalian cell surface is analysed by a genetic approach. Genetic analysis of the cell surface, especially when combined with immunological techniques, has a long history. In 1900, Landsteiner showed that serum from one individual could agglutinate the red cells of another. Besides the practical result of making blood transfusion safe, this was the first demonstration of a human genetic polymorphism, and for the next 50 years, the red blood cell surface provided most of the genetic markers used

to study human populations
