Argumentative Writing in a Second Language Alan R. Hirvela, Diane Belcher, 2021-12-13 Argumentative Writing in a Second Language is a collection on teaching argumentative writing offering multiple vantage points drawn from the contributors own teaching and research experiences The value of learning how to compose argumentative texts cannot be overstated and yet very little attention has been allocated to the equally important topic of how argumentation is or can be taught in the L2 context Thus this volume shifts attention to teachers and argumentative writing instruction especially within increasingly common multimodal and digital literacy settings While doing so it provides a comprehensive wide ranging view of the L2 argumentative writing landscape within an instructional lens Part I of the volume is topic oriented and focuses on explorations of important issues and perspectives while Part II features several chapters reporting classroom based studies of a variety of instructional approaches that expand our understanding of how argumentative writing can be taught The book will be of value to pre service and in service teachers in varying instructional contexts as well as teacher educators and L2 writing scholars researchers

Resources in Education , 1994-06 *The SAGE Guide to Educational Leadership and Management* Fenwick W. English, 2015-01-29 The SAGE Guide to Educational Leadership and Management allows readers to gain knowledge of educational management in practice while providing insights into challenges facing educational leaders and the strategies skills and techniques needed to enhance administrative performance This guide emphasizes the important skills that effective leaders must develop and refine including communication developing teams coaching and motivating and

managing time and priorities While being brief simply written and a highly practical overview for individuals who are new to this field this reference guide will combine practice and research indicate current issues and directions and choices that need to be made Features Benefits 30 brief signed chapters are organized in 10 thematic parts in one volume available in a choice of electronic or print formats designed to enable quick access to basic information Selective boxes enrich and support the narrative chapters with case examples of effective leadership in action Chapters conclude with bibliographic endnotes and references to further readings to guide students to more in depth presentations in other published sources Back matter includes an annotated listing of organizations associations and journals focused on educational leadership and administration and a detailed index This reference guide will serve as a vital source of knowledge to any students pursuing an education degree as well as for individuals interested in the subject matter that do not have a strong foundation of the topic

Foundations of Data Visualization Min Chen, Helwig Hauser, Penny Rheingans, Gerik Scheuermann, 2020-08-11 This is the first book that focuses entirely on the fundamental questions in visualization Unlike other existing books in the field it contains discussions that go far beyond individual visual representations and individual visualization algorithms It offers a collection of investigative discourses that probe these questions from different perspectives including concepts that help frame these questions and their potential answers mathematical methods that underpin the scientific reasoning of these questions empirical methods that facilitate the validation and falsification of potential answers and case studies that stimulate hypotheses about potential answers while providing practical evidence for such hypotheses Readers are not instructed to follow a specific theory but their attention is brought to a broad range of schools of thoughts and different ways of investigating fundamental questions As such the book represents the by now most significant collective effort for gathering a large collection of discourses on the foundation of data visualization Data visualization is a relatively young scientific discipline Over the last three decades a large collection of computer supported visualization techniques have been developed and the merits and benefits of using these techniques have been evidenced by numerous applications in practice These technical advancements have given rise to the scientific curiosity about some fundamental questions such as why and how visualization works when it is useful or effective and when it is not what are the primary factors affecting its usefulness and effectiveness and so on This book signifies timely and exciting opportunities to answer such fundamental questions by building on the wealth of knowledge and experience accumulated in developing and deploying visualization technology in practice
