proposes gender is the defining concern of romance As the foundational narratives of courtship romances participate in the late medieval elaboration of new meanings around heterosexual identity Crane draws on feminist and genre theory to argue that Chaucer's profound interest in the cultural construction of masculinity and femininity arises in large part from his experience of romance In depicting the maturation of young women and men romances stage an ideology of identity that is based in gender difference Less obviously gendered concerns of romance social hierarchy magic and adventure are also involved in expressing femininity and masculinity The genders prove to be not simply binary opposites but overlapping and shifting coreferents Precarious social standing can carry a feminine taint women's adventures recall but also contradict those of men This lively study reveals that Chaucer's redeployments of romance are particularly sensitive to the crucial place gender holds in the genre Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The Ancestor's Tale* Richard Dawkins, Yan Wong, 2010-12-16 One of the most brilliant scientists of our age gives us his definitive work a synthesis of his comprehensive vision of life THE ANCESTOR'S TALE is a pilgrimage back through time a journey on which we meet up with fellow pilgrims as we and they converge on our common ancestors Chimpanzees join us at about 6 million years in the past orang utans at 14 million years as we stride on together a growing band The journey provides the setting for a collection of some 40 tales Each explores an aspect of evolutionary biology through the stories of characters met along the way The tales are interspersed with prologues detailing the journey route maps showing joining lineages and life like reconstructions of our common ancestors THE ANCESTOR'S TALE represents a pilgrimage on an unimaginable scale our goal is four billion years away and the number of pilgrims joining us grows vast ultimately encompassing all living creatures At the end of the journey lies something remarkable in its simplicity and transformative power the first humble replicating molecules **Studies in the Psychology of Sex: Sexual selection in man** Havelock Ellis, 1914 **House of Horrors** Nige Cawthorne, 2008-08-04 In the quiet Austrian town of Amstetten in the balmy spring of April 2008 a truly horrifying vision of hell was discovered by police in the cellar of a normal suburban home On 28 August 1984 seemingly respectable family man Josef Fritzl had lured Elisabeth the youngest of his seven children into the cellar of their family home where he then drugged and handcuffed her in a windowless dungeon he'd spent years constructing For the next 24 years Josef held his daughter captive in unimaginable conditions and repeatedly raped her fathering seven children When the eldest captive child Kerstin was admitted to hospital Josef's sickening web of incest and abuse was uncovered by the authorities This is the full and utterly disturbing true story of what happened in those underground chambers of horror Studies in the Psychology of Sex: Sexual selection in man: I.
