However, acupressure is not a substitute for medical care; it is often an appropriate complementary treatment. The Acupressure points are located between the shoulder blades, the spine at the level of the heart, the soles of one's feet and palms and all over the body. Patients with life-threatening diseases and serious medical problems such as a stroke or heart attack or any serious medical condition should always consult their doctor and take treatment before using acupressure therapies. Acupressure is not an appropriate sole treatment for cancer, contagious skin diseases or sexually transmitted diseases but in conjunction with proper medical attention, however gentle acupressure can help soothe and relieve a patient's distress and diseases.
