Conn's Handbook of Models for Human Aging Jeffrey L. Ram, P. Michael Conn, 2018-04-05 Conn's Handbook of Models for Human Aging Second Edition presents key aspects of biology nutrition factors affecting lifespan methods of age determination use in research and the disadvantages advantages of use Using a multidisciplinary approach this updated edition is designed as the only comprehensive current work that covers the diversity in aging models Chapters on comparative models explore age related diseases including Alzheimer's joint disease cataracts cancer and obesity Also included are new tricks and approaches not available in primary publications This must have handbook is an indispensable resource for researchers interested in the mechanisms of aging gerontologists health professionals allied health practitioners and students Combines both the methods of study for human aging and animal models Provides a historical overview and discussion of model availability key methods and ethical issues Contains over 200 full color illustrations

Handbook of Plant and Animal Toxins in Food Gulzar Ahmad Nayik, Jasmeet Kour, 2022-04-18 The prevalence of naturally occurring toxins in plant and animal foods represents one of the most significant food safety issues drawing the attention of both scientists and regulators alike This unexplored area related to food quality is indeed a big concern for consumers various regulatory authorities and food industries Apart from essential nutrients several food crops are capable of producing a vast array of nonnutritious secondary metabolic products These toxins produced as secondary metabolites have the potential to exhibit both beneficial and deleterious effects in both human beings and animals Nevertheless there has been huge progress in agricultural practices and food processing technologies but still the number of nonnutritive substances and naturally derived toxins persist in our diet Handbook of Plant and Animal Toxins in Food Occurrence Toxicity and Prevention focuses on various selected toxins in foods derived from plants as well as animals The prominent plant toxins include solanine and chaconine mushroom toxins phytates tannins oxalates goitrogens gossypol phytohemagglutinins erucic acid saponins cyanogenic glycosides enzyme inhibitors BOAA lathrogens toxic amino acids and toxic fatty acids The prominent animal toxins covered in the book include various seafood toxins shellfish toxins and biogenic amines Key Features Presents complete information about a plethora of toxins Provides quick and easy access to data on major plant and animal toxins Covers distribution of toxins in the plant and animal kingdom Provides comprehensive information on chemistry safety and precautions of each toxin Commencing with a brief introduction of food toxins this book is designed in such a way that the readers will be introduced to toxicity safety and occurrence of each toxin selected It also discusses the in depth detailed information on food poisoning and its prevention The book will also shed light on foodborne illness associated with toxins The primary audience for this work will be food scientists food toxicologists university scholars and college students Furthermore the book will be of immense help for public health officials pharmacologists and food safety officers who are involved with enforcing regulations meant to ensure the safety of a particular food

Quantifying Uncertainty in Subsurface Systems

Céline Scheidt, Lewis Li, Jef Caers, 2018-04-27 Under the Earth's surface is a rich array of geological resources many with potential use to humankind. However extracting and harnessing them comes with enormous uncertainties, high costs and considerable risks. The valuation of subsurface resources involves assessing discordant factors to produce a decision model that is functional and sustainable. This volume provides real world examples relating to oilfields, geothermal systems, contaminated sites and aquifer recharge. Volume highlights include: A multi-disciplinary treatment of uncertainty quantification. Case studies with actual data that will appeal to methodology developers. A Bayesian evidential learning framework that reduces computation and modeling time. Quantifying Uncertainty in Subsurface Systems is a multidisciplinary volume that brings together five major fields: information science, decision science, geosciences, data science and computer science. It will appeal to both students and practitioners and be a valuable resource for geoscientists, engineers and applied mathematicians. The Handbook of the Arctic Egor V. Pak, Artem I. Krivtsov, Natalia S. Zagrebelnaya, 2022-07-30 This book offers a broad and holistic overview of issues in the Arctic today, a region which is transforming due to changing world order and climate agenda. While new economic opportunities and with China as well as other geopolitical players in the region are emerging, new security challenges are arising as well. In this comprehensive scholarly resource, contributors from around the world and from a broad variety of disciplines share their thoughts on the future of the Arctic in a manuscript that will be of interest to researchers, economists and policymakers.

The Storm-petrels Rob Thomas, 2024-07-25 The first definitive work on the European Storm petrel and its relatives by one of the world's leading experts on the species. Imagine a bird as small as a sparrow which lives most of its life on the open ocean yet can survive for decades. It walks on water and migrates half way around the world, returning to remote islands to breed underground, often in the same rock crevice each year. At night it lays an enormous egg, feeding its chick until the nestling weighs more than both parents put together. It seems to have little fear of humans but was itself feared by ancient seafarers. This might sound like the stuff of legend but is actually the description of a real creature: the storm petrel, walker on water, global wanderer, climate sentinel and open ocean survivor. In this beautifully written monograph, Rob Thomas explores the remarkable life of the European Storm petrel, comparing and contrasting its behaviour and ecology across its range and with the other storm petrels of the world. We learn about their evolution, taxonomy, migration and adaptations to a life in the harsh open ocean while also discovering what these enigmatic seabirds are revealing about what humans are doing to our planet. Illustrated with 150 photographs and including the author's personal anecdotes and observations. Storm petrels highlights some of the most exciting recent research findings and sets a trajectory for future discoveries.

Conservation of Marine Birds Lindsay Young, Eric VanderWerf, 2022-09-27 Conservation of Marine Birds is the first book to outline and synthesize the myriad of threats faced by one of the most imperiled groups of birds on earth. With more than half of all 346 seabird species worldwide experiencing population declines and 29% of species

recognized as globally threatened by the International Union for Conservation of Nature the timing to determine solutions to threats could not be more urgent Written by a diverse team of international experts on marine birds this book explores the environmental and biogeographical factors that influence seabird conservation and provides concrete recommendations for mounting climate change issues This book will be an important resource for researchers and conservationists as well as ecologists and students who want to understand seabirds the threats they are facing and tactics to help conserve and protect them Outlines both threats and solutions in the marine and terrestrial realm Synthesizes information to provide a comprehensive strategy moving forward especially considering climate change Created by a team of experts with the latest and most comprehensive knowledge of seabird conservation

Advances in Remote Sensing Technology and the Three Poles Manish Pandey, Prem C. Pandey, Yogesh Ray, Aman Arora, Shridhar D. Jawak, Uma K. Shukla, 2022-12-12 ADVANCES IN REMOTE SENSING TECHNOLOGY AND THE THREE POLES Covers recent advances in remote sensing technology applied to the Three Poles a concept encompassing the Arctic Antarctica and the Himalayas Advances in Remote Sensing Technology and the Three Poles is a multidisciplinary approach studying the lithosphere hydrosphere encompassing both limnosphere and oceanosphere atmosphere biosphere and anthroposphere of the Arctic the Antarctic and the Himalayas The drastic effects of climate change on polar environments bring to the fore the often subtle links between climate change and processes in the hydrosphere biosphere and lithosphere while unanswered questions of the polar regions will help plan and formulate future research projects Sample topics covered in the work include Terrestrial net primary production of the Arctic and modeling of Arctic landform evolution Glaciers and glacial environments including a geological geophysical and geospatial survey of Himalayan glaciers Sea ice dynamics in the Antarctic region under a changing climate the Quaternary geology and geomorphology of Antarctica Continuous satellite missions data availability and the nature of future satellite missions including scientific data sharing policies in different countries Software tools models and remote sensing technology for investigating polar and other environments For postgraduates and researchers working in remote sensing photogrammetry and landscape evolution modeling Advances in Remote Sensing Technology and the Three Poles is a crucial resource for understanding current technological capabilities in the field along with the latest scientific research that has been conducted in polar areas

Land Cover and Land Use Change on Islands Stephen J. Walsh, Diego Riveros-Iregui, Javier Arce-Nazario, Philip H. Page, 2020-07-16 Globalization is not a new phenomenon but it is posing new challenges to humans and natural ecosystems in the 21st century From climate change to increasingly mobile human populations to the global economy the relationship between humans and their environment is being modified in ways that will have long term impacts on ecological health biodiversity ecosystem goods and services population vulnerability and sustainability These changes and challenges are perhaps nowhere more evident than in island ecosystems Buffeted by rising ocean temperatures extreme weather events sea level rise climate change tourism population migration invasive species and

resource limitations islands represent both the greatest vulnerability to globalization and also the greatest scientific opportunity to study the significance of global changes on ecosystem processes human environment interactions conservation environmental policy and island sustainability In this book we study islands through the lens of Land Cover Land Use Change LCLUC and the multi scale and multi thematic drivers of change In addition to assessing the key processes that shape and re shape island ecosystems and their land cover land use changes the book highlights measurement and assessment methods to characterize patterns and trajectories of change and models to examine the social ecological drivers of change on islands For instance chapters report on the results of a meta analysis to examine trends in published literature on islands a satellite image time series to track changes in urbanization social surveys to support household analyses field sampling to represent the state of resources and their limitations on islands and dynamic systems models to link socio economic data to LCLUC patterns The authors report on a diversity of islands conditions and circumstances that affect LCLUC patterns and processes often informed through perspectives rooted for instance in conservation demography ecology economics geography policy and sociology The Handbook of New Zealand Mammals Carolyn King,David

Forsyth,2021-01-20 The Handbook of New Zealand Mammals is the only definitive reference on all the land breeding mammals recorded in the New Zealand region including the New Zealand sector of Antarctica It lists 65 species including native and exotic wild and feral living and extinct residents vagrants and failed introductions It describes their history biology and ecology and brings together comprehensive and detailed information gathered from widely scattered or previously unpublished sources The description of each species is arranged under standardised headings for easy reference Because the only native land breeding mammals in New Zealand are bats and seals the great majority of the modern mammal fauna comprises introduced species whose arrival has had profound effects both for themselves and for the native fauna and flora The book details changes in numbers and distribution for the native species and for the arrivals it summarises changes in habitat diet numbers and size in comparison with their ancestral stocks and some of the problems they present to resource managers For this third edition the text and references have been completely updated and reorganised into Family chapters The colour section includes 14 pages of artwork showing all the species described and their main variations plus two pages of maps **Antarctic Krill and Interactions in the East Antarctic Ecosystem** So Kawaguchi,Sophie Bestley,Martin

Cox,Kerrie M. Swadling,Elanor Bell,2025-08-19 Antarctic krill *Euphausia superba* is the target of the largest commercial fishery in the Southern Ocean Its abundance varies regionally and exhibits great interannual variability This natural variability combined with climate change effects could have substantial consequent impacts on krill predators and the magnitude of ecologically sustainable fishery catch limits Recent increase in the krill catch is due to technological developments in both harvesting and catch processing methods as well as interest in new products derived from krill e g dietary supplements and pet food The krill fishery is managed by the Commission for the Conservation of Antarctic Marine

Living Resources CCAMLR The krill fishery first commenced in 1970 s off East Antarctica but the main fishing ground shifted to the South Atlantic sector from the 1990 s Interest to fish off East Antarctica has been expressed by CCAMLR Member nations in recent years and the krill fishery recommenced in Indian Ocean sector of East Antarctic sector in the 2016 17 fishing season Given the increase in recent commercial interest the trigger level total allowed catch in one of the management areas CCAMLR Subarea 48 1 has been reached seven times in the Southwest Atlantic the East Antarctic fishery is likely to expand in coming years CCAMLR employs an ecosystem based management approach This requires a wide range of data and information from across regional ecosystem components In the southwest Atlantic sector krill management is based on large scale krill biomass surveys undertaken in 2000 and 2019 together with various national Antarctic programs conducting annual regional scale monitoring this provides assessments of year to year variation of krill ecosystem parameters for CCAMLR to ensure harvesting is carried out in a sustainable manner Contrary to the relatively data rich Southwest Atlantic sector current precautionary catch limits for the krill fishery off East Antarctica are solely based on information collected through the two large scale multidisciplinary surveys conducted by Australia in Divisions 58 4 1 in 1996 and 58 4 2 in 2006 This Research Topic gathers up to date scientific analysis on the East Antarctic ecosystem arising from recent marine science voyages such as ENRICH Euphausiids and Nutrient Recycling In Cetacean Hotspots in 2019 and TEMPO Trends in Euphausiids off Mawson Predators and Oceanography in 2021 Our topic provides an opportunity to explore ecosystem wide scientific studies including non exclusively krill biomass ecosystem structure and interactions between krill krill predators oceanography and primary production to inform sustainable krill fishery management in the region

The Action Plan for Australian Birds 2020 Stephen T. Garnett, G Barry Baker, 2021-12-01 The Action Plan for Australian Birds 2020 is the most comprehensive review of the status of Australia s avifauna ever attempted The latest in a series of action plans for Australian birds that have been produced every decade since 1992 it is also the largest The accounts in this plan have been authored by more than 300 of the most knowledgeable bird experts in the country and feature far more detail than any of the earlier plans This volume also includes accounts of over 60 taxa that are no longer considered threatened mainly thanks to sustained conservation action over many decades This extensive book covers key themes that have emerged in the last decade including the increasing impact of climate change as a threatening process most obviously in Queensland s tropical rainforests where many birds are being pushed up the mountains However the effects are also indirect as happened in the catastrophic fires of 2019 20 Many of the newly listed birds are subspecies confined to Kangaroo Island where fire destroyed over half the population But there are good news stories too especially on islands where there have been spectacular successes with predator control Such uplifting results demonstrate that when action plans are followed by action on the ground threatened species can indeed be recovered and threats alleviated

Britain's Birds Rob Hume, Robert Still, Andy Swash, Hugh Harrop, David Tipling, 2020-07-14 A new improved and thoroughly updated edition of the bestselling
