Measuring Economic Growth and Productivity Barbara Fraumeni, 2019-11-06. *Measuring Economic Growth and Productivity: Foundations, KLEMS Production Models, and Extensions* presents new insights into the causes, mechanisms, and results of growth in national and regional accounts. It demonstrates the versatility and usefulness of the KLEMS databases, which generate internationally comparable industry-level data on outputs, inputs, and productivity. By rethinking economic development beyond existing measurements, the book's contributors align the

measurement of growth and productivity to contemporary global challenges addressing the need for measurements as well as the Gross Domestic Product All contributors in this foundational volume are recognized experts in their fields all inspired by the path breaking research of Dale W Jorgenson Financial Crisis, Austerity, and Electoral Politics Pedro Magalhães, 2017-10-02 This book examines the domestic electoral consequences of the economic and financial crisis in Europe particularly in those countries where the crisis manifested itself more devastatingly the Southern European countries of Greece Italy Portugal and Spain as well as Iceland and Ireland On the surface the electoral consequences of the crisis seem largely similar having resulted in these countries in large electoral losses for incumbents as the most elementary versions of economic voting theory would have us expect However behind this fundamental similarity important differences emerge Whilst in some cases on the basis of post election surveys it is possible to see that the crisis elections followed a previous pattern of performance oriented voters with no major changes either in known predictors of electoral choices or in basic party system properties other elections brought the emergence of new parties new issues and cleavages altering patterns of political competition By examining these different outcomes by comparing the crisis elections with previous ones this book takes into account their timing relative to different stages of crisis It also scrutinises party strategies and campaign dynamics particularly as governments attempted and sometimes succeeded in framing events and proposals so as to apportion responsibility for economic outcomes This book was originally published as a special issue of the Journal of Elections Public Opinion and Parties **Human Development in South Asia 2008** The Mahbub ul Haq Human Development Centre, 2009-10-01 The Report presents an analysis of the diffusion and adoption of technology particularly ICT in the region and its impact on overall economic growth employment poverty reduction as well the provision of health and education services in the region The report draws from several interesting case studies particularly from India and Bangladesh that illustrate how ICT is being used innovatively to improve the efficiency and transparency in the delivery of public services The Report however reiterates that technology by itself does not result in wonders It has to be accompanied with an educated and skilled population as well as basic infrastructure **Contemporary Issues in Behavioral Finance** Simon Grima, Ercan Özen, Hakan Boz, Jonathan Spiteri, Eleftherios I. Thalassinou, 2019-07-04 This special edition of Contemporary Studies in Economic and Financial Analysis offers seventeen chapters from invited participants in the International Applied Social Science Congress held in Turkey between the 19th and 21st April 2018 **Social Mobility in Developing Countries** Vegard Iversen, Anirudh Krishna, Kunal Sen, 2021-12-17 Social mobility is the hope of economic development and the mantra of a good society There are disagreements about what constitutes social mobility but there is broad agreement that people should have roughly equal chances of success regardless of their economic status at birth Concerns about rising inequality have engendered a renewed interest in social mobility especially in the developing world However efforts to construct the databases and meet the standards required for conventional analyses of social mobility are

at a preliminary stage and need to be complemented by innovative conceptual and methodological advances. If forms of mobility have slowed in the West then we might be entering an age of rigid stratification with defined boundaries between the always haves and the never haves which does not augur well for social stability. Social mobility research is ongoing with substantive findings in different disciplines typically with researchers in isolation from each other. A key contribution of this book is the pulling together of the emerging streams of knowledge. Generating policy relevant knowledge is a principal concern. Three basic questions frame the study of diverse aspects of social mobility in the book: How to assess the extent of social mobility in a given development context when the datasets by conventional measurement techniques are unavailable; How to identify drivers and inhibitors of social mobility in particular developing country contexts; How to acquire the knowledge required to design interventions to raise social mobility either by increasing upward mobility or by lowering downward mobility.

The compiled content is based on the collective knowledge of over 300 leading researchers, experts and policymakers brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated Mountain Development (ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports under the guidance of the HIMAP Steering Committee. Eklavya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatri (Nepal), Linxiu Zhang (China), Surendra Pratap Singh (India), Tandong Yao (China) and David Molden (ICIMOD and Chair of the HIMAP SC).
