

- 1 Use logarithms to solve the equation $e^x = 3^{x-2}$, giving your answer correct to 3 decimal places. [3]

- 2 (i) Use the trapezium rule with 3 intervals to estimate the value of

$$\int_{\frac{1}{2}\pi}^{\frac{3}{2}\pi} \operatorname{cosec} x \, dx,$$

giving your answer correct to 2 decimal places. [3]

- (ii) Using a sketch of the graph of $y = \operatorname{cosec} x$, explain whether the trapezium rule gives an overestimate or an underestimate of the true value of the integral in part (i). [2]

- 3 The polynomial $ax^3 + bx^2 + x + 3$, where a and b are constants, is denoted by $p(x)$. It is given that $(3x + 1)$ is a factor of $p(x)$, and that when $p(x)$ is divided by $(x - 2)$ the remainder is 21. Find the values of a and b . [5]

- 4 The parametric equations of a curve are

$$x = \frac{1}{\cos^3 t}, \quad y = \tan^3 t,$$

where $0 \leq t < \frac{1}{2}\pi$.

- (i) Show that $\frac{dy}{dx} = \sin t$. [4]

- (ii) Hence show that the equation of the tangent to the curve at the point with parameter t is $y = x \sin t - \tan t$. [3]

- 5 Throughout this question the use of a calculator is not permitted.

The complex numbers w and z satisfy the relation

$$w = \frac{z + i}{iz + 2}.$$

- (i) Given that $z = 1 + i$, find w , giving your answer in the form $x + iy$, where x and y are real. [4]

- (ii) Given instead that $w = z$ and the real part of z is negative, find z , giving your answer in the form $x + iy$, where x and y are real. [4]

Rebirth Jennifer Whitmer Taylor, 2025-04-10 Reimagining both the House Museum and Reconstruction memory for the twenty first century In *Rebirth* public historian Jennifer Whitmer Taylor provides a compelling account of how to reenvision the historic house museum Using the Museum of the Reconstruction Era known as the Woodrow Wilson Family Home for most of its many years as a house museum as a case study Taylor explores the challenges and possibilities that face public history practitioners and museum professionals who provide complex interpretations of contested public memory Anchored by oral history interviews with docents who interact directly with the visiting public *Rebirth* considers how a dated and seemingly outmoded venue for interpretation the historic house museum can be reimagined for twenty first century audiences Taylor offers best practices for interpreting issues such as white supremacy and domestic political terrorism for public audiences and she challenges readers to contemplate how historic sites interact with and contribute to vital contemporary political conversations *Rebirth* is a necessary book for public history practitioners students of museum studies and historic site interpretation and those interested in the history and memory of the Reconstruction era **Modeling**

Individual Differences in Perceptual Decision Making Joseph W. Hout, Cheng-Ta Yang, James T. Townsend, 2017-01-18 To deal with the abundant amount of information in the environment in order to achieve our goals human beings adopt a strategy to accumulate some information and filter out other information to ultimately make decisions Since the development of cognitive science in the 1960s researchers have been interested in understanding how human beings process and accumulate information for decision making Researchers have conducted extensive behavioral studies and applied a wide range of modeling tools to study human behavior in simple detection tasks and two choice decision tasks e g discrimination classification In general researchers often assume that the manner in which information is processed for decision making is invariant across individuals given a particular experimental context Independent variables including speed accuracy instructions stimulus properties i e intensity and characteristics of the participants i e aging cognitive ability are assumed to affect the parameters in a model i e speed of information accumulation response bias but not the way that participants process information e g the order of information processing Given these assumptions much modeling has been accomplished based on the grouped data rather than the individual data However a growing number of studies have demonstrated that there were individual differences in the perceptual decision process In the same task context different groups of the participants may process information in different manners The capacity and architecture of the decision mechanism were found to vary across individuals implying that humans decision strategies can vary depending on the context to maximize their performance In this special issue we focused on a particular subset of cognitive models particularly accumulator models multinomial processing trees and systems factorial technology SFT as applied to perceptual decision making The motivation for the focus on perceptual decision making is threefold Empirical studies of perception have grown out of a history of

making a large number of observations for each individual so as to achieve precise estimates of each individual's performance. This type of data rather than a small number of observations per individual is most amenable to achieving precision in individual level and group level cognitive modeling. Second, the interaction between the acquisition of perceptual information and the decisions based on that information to the extent that those processes are distinguishable offers rich data for scientific exploration. Finally, there is an increasing interest in the practical application of individual variation in perceptual ability whether to inform perceptual training and expertise or to guide personnel decisions. Although these practical applications are beyond the scope of this issue, we hope that the research presented herein may serve as the foundation for future endeavors in that domain.

The Politics of Autism John J. Pitney Jr., 2015-08-06 In the first book devoted exclusively to the contentious politics of autism, noted political scientist and public policy expert John J. Pitney Jr. explains how autism has evolved into a heated political issue disputed by scientists, educators, social workers, and families. Nearly everything about autism is subject to debate and struggle, including its measurement and definition. Organizational attempts to deal with autism have resulted in not a single autism policy but a vast array of policies at the federal, state, and local levels, which often leave people with autism and their families frustrated and confused. Americans with autism are citizens, friends, coworkers, sons, daughters, fathers, and mothers. No longer simply the objects of public policy, they are active participants in current policy debates. Pitney's fascinating look at how public policy is made and implemented offers networks of concerned parents, educators, and researchers a compass to navigate the current systems and hope for a path towards more regularized and effective policies for America's autism community.

Handbook of Military and Defense Operations Research Natalie M. Scala, James P. Howard, II, 2024-08-21 Tracing its roots back to World War II operations research, OR has become a vital tool in military and defense strategy. The second edition of the Handbook of Military and Defense Operations Research highlights this evolution, showcasing how OR integrates with cutting-edge areas like artificial intelligence, cybersecurity, and big data analytics. This volume is more than a historical account; it is a practical guide. The volume features expert voices and offers insights into OR applications in modern security challenges. Readers will discover a blend of theory and real-world case studies, making it an essential resource for both newcomers and seasoned defense analysis professionals. Dive into this handbook to explore the rich, dynamic field of military and defense operations research, a discipline at the heart of global security and strategic decision-making. New to the second edition: Reorganized into a three-part structure; Extensive revisions throughout; Numerous new exercises, examples, and case studies; Several new chapters.

The Rise of the Cyberzines: The Story of the Science-Fiction Magazines from 1991 to 2020 Mike Ashley, 2022-02-15 Shortlisted for the Locus Science Fiction Foundation Non-Fiction Award 2023. *The Rise of the Cyberzines* concludes Mike Ashley's five-volume series, which has tracked the evolution of the science fiction magazine from its earliest days in the 1920s to its current explosion via the internet. This series has traced the ways in which the science fiction magazine has reacted to

the times and often led the way in breaking down barriers for example in encouraging a greater contribution by women writers and stimulating science fiction globally Magazines have continued to build upon past revolutions such as the new wave and cyberpunk producing a blend of high tech science fiction and expansive speculative fiction that has broadened the understanding of science and its impact on society This final volume which covers the years 1991 2020 shows how the online magazine has superseded the print magazine and has continued to break down barriers especially for the LGBTQ community and for writers of colour

Changing the Course of Failure Sandra Stotsky, 2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that 1 widespread adolescent underachievement is not susceptible to solution by educational interventions no matter how much money is allocated to public education and 2 there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education for K 12 and college to solve a growing social problem Many policy makers seem to think that teachers schools are the primary cause of low achievement Educational institutions still cannot solve a non education caused problem and haven't done so for over fifty years despite all the public and private money that has been allocated The book concludes with suggested policies for addressing the damage to public education from gap closing standards and with suggested areas for policy making in order to change the current course of failure for many low achieving students

Stopping the Spies Jane Duncan, 2018-06-01 Is South Africa on its way to becoming a surveillance state and will it need a whistleblower In 2013 former National Security Agency NSA contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the communications of millions of innocent citizens International outrage resulted but the Snowden documents revealed only the tip of the surveillance iceberg Apart from insisting on their rights to tap into communications more and more states are placing citizens under surveillance tracking their movements and transactions with public and private institutions The state is becoming like a one way mirror where it can see more of what its citizens do and say while citizens see less and less of what the state does owing to high levels of secrecy around surveillance In this book Jane Duncan assesses the relevance of Snowden's revelations for South Africa In doing so she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state Duncan challenges members of civil society to be concerned about and to act on the ever expanding surveillance capacities of the South African state Is surveillance used for the democratic purpose of making people safer or is it being used for the repressive purpose of social control especially of those considered to be politically threatening to ruling interests She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses
