In Foreign Lands: The Migration of Scientists for Political or Economic Reasons Maria Teresa Borgato, Christine Phili, 2022-04-13 This proceedings volume collects the stories of mathematicians and scientists who have spent and developed parts of their careers and life in countries other than those of their origin The reasons may have been different in different periods but were often driven by political or economic circumstances The lack of suitable employment opportunities in their home countries adverse political systems and wars have led to the emigration of scientists The volume shows that these movements have played an important role in spreading scientific knowledge and have often changed the scientific landscape tradition and future of studies and research fields The book analyses in particular aspects of Euler's Lagrange's and Boscovich's scientific biographies migrations of scientists from France Spain and Greece to Russia in the eighteenth and nineteenth centuries and from Russia to France in the twentieth century exiles from Italy before

Financial Institutions in Distress Ronald Davis, Stephan Madaus, Monica Marcucci, Irit Mevorach, Riz Mokal, Barbara Romaine, Janis Sarra, Ignacio Tirado, 2023-08-10 Political boundaries are often porous to finance financial intermediation and financial distress Yet they are highly impervious to financial regulation When inhabitants of a country suffering a deficit of purchasing power are able to access and deploy funds flowing in from a country with a surfeit of such power the inhabitants of both countries may benefit They may also benefit when institutions undertaking such cross border financial intermediation experience economies of scale and are able to innovate and to offer funds and services at lower costs Inevitably however at least some such institutions will sometimes act imprudently some of the projects in which such funds are deployed may be unwise and other such projects can suffer from unforeseen circumstances As a result of such factors a financial institution may suffer distress in one country and may then transmit such distress to other countries in which it operates The efficacy of any response to such cross border transmission of distress may turn on the response being given due effect in both or all the territories in which the distressed financial institution operates This situation creates a conundrum for policymakers legislators and regulators who wish to enable those subject to their jurisdiction to access the benefits of cross border financial intermediation yet cannot make rules and regulations that would have effect outside that jurisdiction This book explores this conundrum and offers a response It does so by drawing on and adding to the literatures on financial intermediation regulation and distress and on existing hard and soft laws and regulations The book advocates for the creation of a model law that would address the full range of financial institutions including insurance companies and that would enable relevant authorities to cooperate with counterparts in advance of the onset of distress and to give appropriate effect in their jurisdiction to measures taken by counterpart authorities in other jurisdictions in which the distressed institution also operates

Moving the AEC Beyond 2015 Tham Siew Yean, 2018-02-14 The ten Southeast Asian economies reached a milestone on 31 December 2015 when they announced the formation of an ASEAN Community Although this includes three pillars ASEAN Political Security Community ASEAN Economic Community AEC and the ASEAN Socio Cultural Community it is the economic pillar that generates immense debate due to its expected quantifiable benefits to member countries This book thus focuses on the ASEAN Economic Community and seeks to explain the need for building domestic consensus within the member countries It starts with an overview chapter describing the current achievements of the AEC It then explores possible explanations for the achievements non achievements and offers a hypothesis on conflicting economic interests in a country as one possible explanation for gaps in implementation This is because any form of economic liberalisation brings with it the winners and losers thereby raising resistance to liberalization measures and slowing down the implementation process The book includes six country chapters Indonesia Malaysia the Philippines Singapore Thailand and Vietnam that examine sources of domestic conflict s in greater detail and depth It also includes a regional chapter co authored by the ex Secretary General of ASEAN Mr Rodolfo Severino that brings out the political nature of ASEAN economic

cooperation since its inception in 1976 For ASEAN beyond 2015 the book articulates the need to obtain a strong domestic consensus that supports the integration initiatives of the AEC This can be viewed as a way forward to accelerate and deepen integration within ASEAN The book concludes with some suggestions on how each country can move towards achieving domestic consensus based on the respective country level analysis International Human Rights Law and Practice Ilias Bantekas, Lutz Oette, 2016-09-29 The second edition of this innovative textbook explores human rights law through an engaging combination of theory and practice **Annual Report of the Commissioner of Patents** United States. Patent Office, 1886 *Accounts and Papers* Great Britain. Parliament. House of Lords, 1852 *Indian Air Force in India's National Defence 2032* , 2014-06-15 The Indian Air Force IAF from a humble beginning in 1932 with four Wapiti aircraft six Indian officers and 22 hawai sepoys has traversed a long journey and crossed noteworthy milestones to become the fourth largest air force in the world In the past 81 years while facing several limitations challenges the IAF has met all the national defence requirements and made several strategic contributions The 1948 Kashmir airlift Tangail paradrop heli bridging in East Pakistan and many other achievements are historic examples of its sterling performance The only war independent India has lost was the one in which the IAF was not employed in a combat role With growing economic interests and national aspirations expanding interests well beyond our territorial boundaries and prevailing internal security challenges India's national defence requirements are also increasing Reliance of sovereign nation states on aerospace power is essentially growing The first Gulf War was a monumental turning point in the war time employment of aerospace power Ever since the significance of aerospace power in war crisis and peace time has been gaining ascendancy Kosovo and Libya are the two pertinent examples of the allies virtually relying on aerospace power without committing any soldiers on the ground Scrutiny of the emerging global and national trends suggests that employment of aerospace assets as well as the nation's expectation from the IAF will continue to rise Alongside there is an unplanned fall in flying platforms weapon systems and pilot strength of the IAF This study is an attempt to analyse the history of the IAF in war as well as other than war operations to appreciate the emerging trends in geopolitics aerospace technology and doctrine and to identify the likely challenges the IAF would be facing in the next two decades and beyond A roadmap for transformation of the national security framework the indigenous aerospace industry and the IAF has also been suggested
