The UK Regional-National Economic Problem Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

The Dynamics of Asian Economic Development Hitoshi Hirakawa, Ferdinand C. Maquito, 2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world s attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China s Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China s BRI has prompted the investment competition between Japan and the US which has made even stronger the possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China [China's Economic Development](#) Lee Pei May, 2024-06-21 Through a rigorous examination of China s rise Lee addresses an important question Did China catch up Or more specifically can growth be automatically translated to catching up with the advanced industrialised countries or has it only allowed limited progress if any to be made To answer these queries and the broader question of the possibility of the Global South converging with the Global North four development theories are utilised with competing explanations to uncover the complexity and multifaceted development of China This includes whether China really has a unique developmental model to offer Positioning China within the global economy this book traces its developmental progress over

time as well as its progress relative to other countries To understand whether the Chinese political economy is socialist or not Lee moves away from the orthodox definition of socialism and instead examines the official narrative of Socialism with Chinese Characteristics Lastly this book argues that though China is catching up challenges that could potentially block China's progress for a full catch up are to be anticipated A useful resource for students and scholars in the fields of international relations international political economy Chinese studies and development studies Global Economic Prospects, June 2020 World Bank Group, 2020-07-07 The COVID 19 pandemic has with alarming speed dealt a heavy blow to an already weak global economy which is expected to slide into its deepest recession since the second world war despite unprecedented policy support The global recession would be deeper if countries take longer to bring the pandemic under control if financial stress triggers defaults or if there are protracted effects on households and firms Economic disruptions are likely to be more severe and protracted in emerging market and developing economies with larger domestic outbreaks and weaker medical care systems greater exposure to international spillovers through trade tourism and commodity and financial markets weaker macroeconomic frameworks and more pervasive informality and poverty Beyond the current steep economic contraction the pandemic is likely to leave lasting scars on the global economy by undermining consumer and investor confidence human capital and global value chains Being mostly a reflection of the recent plunge in global energy demand low oil prices are unlikely to provide much of a boost to global growth in the near term While policymakers immediate priorities are to address the health crisis and moderate the short term economic losses the likely long term consequences of the pandemic highlight the need to forcefully undertake comprehensive reform programs to improve the fundamental drivers of economic growth once the crisis abates *Global Economic Prospects* is a World Bank Group Flagship Report that examines global economic developments and prospects with a special focus on emerging market and developing economies on a semiannual basis in January and June The January edition includes in depth analyses of topical policy challenges faced by these economies while the June edition contains shorter analytical pieces *Service Industries and Regions* Juan R. Cuadrado-Roura, 2013-03-26 The service sector in most advanced economies accounts for up to seventy percent of employment and GDP and given its growing importance has received much research attention over the last two decades However not very much attention has been paid to the relationship between this sector and both its territorial impact and regional effects The main objective of this book is to offer a comprehensive approach to these aspects focusing particularly on the location factors of service industries and the importance of some specific services such as business services and knowledge and information services The contributions have been prepared by well known experts in the field from a wide number of countries The focus of all contributions is not only on theoretical aspects but also provides empirical analyses on specific countries and topics such as the geographical concentration globalization impacts foreign direct investments and innovation Australia's Welfare Wars Revisited Philip Mendes, 2007 This book explores the role played by

ideologies and lobby groups in determining welfare state outcomes with specific reference to up to date theories about globalisation

Domination and Subordination as a Social Organization Principle in Georg Simmel's Soziologie Adele Bianco, 2014-07-16
Analyzing Georg Simmel's theory of domination and subordination as presented in his *Soziologie* 1908 Adele Bianco focuses on concrete case studies to derive an interpretation of globalization processes Within sociology domination and subordination are reciprocal They represent constitutive modes of associated living based on a hierarchical structure Domination and subordination reflect social configurations but are very controversial categories Sometimes perceived as a justification of the status quo they also run the risk of legitimizing the perpetuation of inequalities In truth they are tools to help us understand social order and identify inequalities regulating structures Domination and Subordination as a Social Organization Principle in Georg Simmel's *Soziologie* begins by defining the relationship between domination and subordination at the micro level the relationship among subjects Then after discussing the macro level Bianco employs a variety of case studies to expose the intricacies of Simmel's domination and subordination theory The ensuing discussions of democracy employment relationships social relationships and globalization answer such questions as Why is society divided between a top and a bottom What does it mean to wield authority What degrees of power are held by those in a position of inferiority Why is the strong subject ultimately in need of the weak subject What can be said of a majority winning in a democracy and what is the minority left with How can the social condition of the modern worker be reconciled with his proclaimed freedom and What does subordination to the employer effectively comprise Scholars and students of sociology social theory labor studies and psychology will benefit from this book's combination of intricate theories and real world case studies towards a comprehensive theory of modern globalization
