you have finely honed your instinctive training ability it will take many weeks even months to evaluate each experiment It definitely pays to master the Weider Instinctive Training Principle Franco Columbo two time Mr Olympia On Progression The key to building massive powerful muscles is to doggedly increase the training weights you use But it is only good to increase training poundage if you do so in perfect form There is a direct correlation between the amount of weight you use with perfect biomechanics in an exercise and the mass of muscles that move that weight Lee Haney three time Mr Olympia On Muscle Confusion Once I reached the advanced level of bodybuilding and started entering competitions I discovered that I quickly became bored with a set training program I began to use the Weider Muscle Confusion Principle changing to a new and more challenging routine every time I came into the gym to bomb a particular body part Lou Ferrigno On Supersets Since supersets constitute a big jump in training intensity I always tell bodybuilders new to the Weider Supersets Training Principles to experiment with supersets compounding movements for the biceps and triceps or forearm flexors and forearm extensors Albert Beckles IFBB World Pro Grand Prix Champion
