

Indicator and warning lights

Visual indicators which inform the driver when a system comes into operation (operation or deactivation indicator lights) or of the occurrence of a fault (warning light).

When the ignition is switched on

The warning lights come on for a few seconds when the vehicle ignition is switched on.

When the engine is started, these warning lights should switch off.

If they remain on, before moving off, consult the text relating to the warning light concerned.

Associated warnings

The lighting of certain indicator/warning lights may be accompanied by an audible signal and a message on the multi-function display.

Operation indicator lights

The lighting of one of the following indicator lights confirms that the corresponding system has come into operation.

Left-hand direction indicator.

Dipped headlamps.

Main beam headlamps.

Handbrake applied.

Right-hand direction indicator.

Front fog lamps.

Rear fog lamps.

Diesel engine pre-heating.

Wait until this switches off before operating the starter.

The indicator/warning light comes on continuously or flashes.

Some indicator/warning lights may light in two different ways. Only by relating the type of lighting to the vehicle operating status can it be ascertained whether the situation is normal or whether a fault has occurred.
