You will find nuggets from experience throughout the book 5 The medications are all hyperlinked noted by generic name in the index This allows for easy access to whichever drug or drug class you need to focus on I would recommend learning by generic name as this was recently stated about drug names on the NCLEX c the NCLEX c examination will reflect on most occasions the use of generic medication names only How should you use this study guide Drugs can do wacky things to patients I know it and I ve seen it However those wacky things that happen once in a career is not what I m trying to teach you You will also not likely be tested on those things I m trying to teach you the stuff that happens day after day Remember I m going to provide you the ESSENTIALS to preparing for the NCLEX c and or your pharmacology courses This is not intended to be a package insert that lists 45 exaggeration but not really side effects with each medication There is no doubt this will help prepare you to pass the pharmacology section of the NCLEX NCLEX c NCLEX RN c and NCLEX PN c are registered trademarks of the National Council of State Boards of Nursing Inc and hold no affiliation or endorsement with this book
