Nfsas Student Loan Differentiate With Other Loans:

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top down leadership system of university management and its double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance. University managements while on one level amenable to change have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt.

South Africa Can Work

Frans Rautenbach, 2017-08-18 What will it take to turn South Africa around? In this insightful and provocative book Frans Rautenbach proposes a complete overhaul of policy thinking and provides fresh arguments that effectively address South Africa's unemployment, race problems and lack of education. Rautenbach examines the fundamental problem of rent seeking to which he proposes two antidotes: the free market and decentralisation of government. Along the way he tackles holy cows such as affirmative action, trade unions, labour law and welfare payments. He also addresses contentious topics such as racism, white privilege, political correctness, state funding of higher education and mounting evidence that trade unions substantially suppress employment growth. Written by a labour lawyer with a proven track record in a range of policy issues, *South Africa Can Work* speaks effectively to a cross section of readers of all disciplines and brings sorely needed good news.

Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less? Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills. Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity. Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination. Tackling this challenge *Discrimination in an Unequal World* explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context. Noting

how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories **ETDP SETA Scarce & Critical Skills Guide 2010/11** ,
