photographer and lecturer Charles Needle often asks students in his workshops if they understand the difference between looking and seeing. The difference he is pointing out is that while we are constantly looking at countless people, places, and things, we might not be actually seeing what is right in front of us. Being tuned into this difference can elevate your art as a photographer, allowing you to be more in tune with your surroundings. Needle has applied this concept to his work, and it shows. Utilizing macro photography to capture the nuances of the nature all around us, in this extensive handbook, Needle covers not only his philosophy for seeing and capturing nature photography but delves into the equipment he uses. Needle covers composition, flash techniques, the fundamentals of macro photography, and so much more. The book features many set-up shots, equipment shots, and sequential shots detailing the progression towards creating the final images. This essential text provides both the inspiration and the technique required to beautifully capture the wonders of nature.
