The Lost Archive Marina Rustow, 2020-01-14 A compelling look at the Fatimid caliphate s robust culture of documentation The lost archive of the Fatimid caliphate 909 1171 survived in an unexpected place the storage room or geniza of a synagogue in Cairo recycled as scrap paper and deposited there by medieval Jews Marina Rustow tells the story of this extraordinary find inviting us to reconsider the longstanding but mistaken consensus that before 1500 the dynasties of the Islamic Middle East produced few documents and preserved even fewer Beginning with government documents before the Fatimids and paper s westward spread across Asia Rustow reveals a millennial tradition of state record keeping whose very continuities suggest the strength of Middle Eastern institutions not their weakness Tracing the complex routes by which Arabic documents made their way from Fatimid palace officials to Jewish scribes the book provides a rare window onto a robust culture of documentation and archiving not only comparable to that of medieval Europe but in many cases surpassing it Above all Rustow argues that the problem of archives in the medieval Middle East lies not with the region s administrative culture but with our failure to understand preindustrial documentary ecology Illustrated with stunning examples from the Cairo Geniza this compelling book advances our understanding of documents as physical artifacts showing how the records

of the Fatimid caliphate once recovered deciphered and studied can help change our thinking about the medieval Islamicate world and about premodern polities more broadly

The Case for Fanfiction Ashley J. Barner, 2017-10-31 Challenging readers to rethink what they read and why the author questions the aesthetic assumptions that have led to the devaluing of fanfiction a genre criticized as both tasteless and derivative and other guilty pleasure reading and writing including romance and fantasy The complicated relationship between fanfic and intellectual property rights is discussed in light of the millennia old tradition of derivative literature before modern copyright law established originality as the hallmark of great fiction Absorbed reading the practice of immersing oneself in the narrative versus critically reading from a distance is a strong motive for the appropriation by fanfiction of canon characters and worlds

What are Archives? Louise Craven, 2016-02-11 This collection of essays breaks new ground in archival studies in the UK where professional archival texts have traditionally concentrated on the how not the why of archival work Studies of the theoretical role of for example the archive and the text or the archive and political power have meanwhile been undertaken in other academic disciplines where there is an established forum for the discussion of related issues This book invites the archivist to join that arena of debate whilst appealing to all those interested in archives from other disciplines the authors encourage archivists to step away from the practicalities of keeping archives to consider what it is they actually do in the cultural context of the early 21st century The wider context of technological innovation and the internet form the backdrop to this collection The book explores change and continuity in the archival paradigm the textual nature of archives and asks if views of manuscripts and personal papers are changing it looks at specific developments in community archives at concepts of identity and culture in archives and it presents the fruits of innovative studies of users of archives Taken together these essays written by leading experts in the field provide a new understanding of the role of the archive today
