A World Made for Money Bret Wallach, 2015-05. A spirited and incisive survey of economic geography. A World Made for Money begins with the author stopped at a red light in Norman, Oklahoma. Observing the landscape of drugstores and banks, and for that matter the stoplight and roads themselves, Bret Wallach observes: "Everything I see has been built to make money or at the very least to facilitate making money." This, he argues, is a global phenomenon that nonetheless has occurred only within the past hundred years or so. Although guidebooks and culture brokers often disparage these landscapes of commerce, Wallach, recipient of a MacArthur genius grant, argues that we would do well to pay them close attention. A World Made for Money provides a compelling condensed tour of our world. From Silicon Valley to Sri Lanka, from post-Soviet Russia to post-apartheid South Africa, Wallach looks at how human beings are buying, manufacturing, working, growing, and shipping food, and accessing the natural resources to fuel it all. These essential facets of daily life, propelled by the profit motive, represent a transnational force shaping our surroundings and environment in ways that may not always be beautiful or even healthy, but that are fundamental to understanding how the world works in the twenty-first century. Wallach examines the relationship between acquisitiveness and landscape, reveals surprising contradictions and nuances, and provides fresh perspective on politically charged topics such as sprawl, deindustrialization, and agribusiness. **Australian Beetles Volume 1** Adam Slipinski, John Lawrence, 2013-10-14. This three-volume series represents a comprehensive treatment of the beetles of Australia, a relatively under-studied fauna that includes many unusual and unique lineages found nowhere else on Earth. Volume 1 contains keys to all 117 beetle families found in Australia and includes over 1100 illustrations of adults, larvae, and anatomical structures. This volume is based in part on Lawrence's few other resources for beetle identification, include such a detailed morphological background. A chapter on the fossil record is also included, and family sections provide full descriptions of adults and larvae, including the world distribution of each family. The revised identification keys, currently recognised as one of the most valuable keys worldwide, will aid quarantine agents, biologists, and students in identifying members of the most species-rich order of animals. **Stored-Product Insect Resource** David Hagstrum, 2009-01-01.
