Developing Software for Symbian OS Steve Babin, 2008-02-28

Many problems encountered by engineers developing code for specialized Symbian subsystems boil down to a lack of understanding of the core Symbian programming concepts. *Developing Software for Symbian OS* remedies this problem as it provides a comprehensive coverage of all the key concepts. Numerous examples and descriptions are also included which focus on the concepts the author has seen developers struggle with the most. The book covers development ranging from low level system programming to end user GUI applications. It also covers the development and packaging tools as well as providing some detailed reference and examples for key APIs. The new edition includes a completely new chapter on platform security. The overall goal of the book is to provide introductory coverage of Symbian OS v9 and help developers with little or no knowledge of Symbian OS to develop as quickly as possible. There are few people with long Symbian development experience compared to demand due to the rapid growth of Symbian in recent years and developing software for new generation wireless devices requires knowledge and experience of OS concepts. This book will use many comparisons between Symbian OS and other OSes to help in that transition. Get yourself ahead with the perfect introduction to developing software for Symbian OS.

Matteo Baldoni, Tran Cao Son, Birna van Riemsdijk, Michael Winikoff, 2009-01-12. This volume constitutes the revised selected papers of the 6th International Workshop DALT 2008 held as satellite workshop of AAMAS 2008, the 7th International Joint Conference on Autonomous Agents and Multiagent Systems in Estoril, Portugal, on May 12, 2008. The 12 papers presented together with 3 invited papers were carefully reviewed and selected from 14 submissions. The workshop provided a discussion forum to both i) support the transfer of declarative paradigms and techniques to the broader community of agent researchers and practitioners and ii) to bring the issue of designing complex agent systems to the attention of researchers working on declarative languages and technologies.
