Aliofkhazraei, 2014-02-20 One of the first thing that comes to your mind after hearing the term corrosion is corrosion of a metal Corrosion is a basically harmful phenomenon but it can be useful in some cases For instance environment s pollution with corrosion products and damage to the performance of a system are among its harmful effects whereas electric energy generation in a battery and cathodic protection of many structures are among its advantages However these advantages are almost nothing as compared to the costs and effects imposed by its detrimental influences The enormous costs of this phenomenon can be better understand through studying the published statistics on direct and indirect corrosion damages on economy of governments The direct cost of corrosion is near 3 % of the gross domestic product GDP of USA Considering this huge cost it is necessary to develop and expand the corrosion science and its protection technologies *NAVDOCKS. ,*
