Ncep Guidelines 20:

Epidemiology and Prevention of Cardiovascular Diseases Darwin Labarthe, 2011 Epidemiology and Prevention of Cardiovascular Disease A Global Challenge Second Edition provides an in depth examination of epidemiologic research and prevention measures for the full range of cardiovascular diseases CVD This authoritative text on the world s leading causes of death describes in detail the nature of atherosclerotic and hypertensive diseases including their determinants prevention and control as well as policies for intervention in community and clinical settings This Second Edition is fully updated more extensively referenced and expanded to include new information about the public health dimensions of CVD prevention exploring the basis of public health decisions and the process by which decision making bodies develop guidelines and recommendations Epidemiology and Prevention of Cardiovascular Diseases A Global Challenge Second Edition is the essential text for any student or practitioner concerned with global cardiovascular health **Preventive Cardiology** Jo Anne Micale Foody, 2007-11-03 Preventive cardiology is a fast moving field that places emphasis on the prevention and treatment of coronary disease Preventive Cardiology Insights Into the Prevention and Treatment of Cardiovascular Disease Second Edition is intended for clinical cardiologists internists primary care providers and allied health care professionals who wish to extend their knowledge and expertise in the rapidly expanding field of preventive cardiology It is the mission of this book to provide clinicians with the understanding and tools necessary to implement prevention in their daily practices Recent changes in the delivery of health care in the United States and abroad in conjunction with new scientific evidence supporting the role of preventive strategies in the maintenance of cardiovascular health have focused new attention and efforts on the field of cardiovascular disease prevention The field of cardiology is thus making a gradual transition from the technology driven intervention oriented perspective of the last several decades to a new preventive molecular based perspective As fresh evidence amasses that preventive measures produce a considerable decrease in the incidence of both primary and secondary cardiac events and mortality there is growing widespread acknowledgment that health care providers from all arenas must initiate preventive strategies in the management and care of their patients *Ethics, Medical Research, and Medicine* Andrew Thompson, Iqbal S. Shergill, N. Temple, 2011-06-27 Andrew Thompson Norman J Temple We humans are an extraordinary species One of our finest achievements is the development of morality of a sense of right and wrong We articulate and then impose this sensitivity upon ourselves in the form of ethical guidelines rules regulations and laws We have regrettably also developed marvelously clever ways of justifying our behavior whenever it runs afoul of these prescriptions We have for example developed the concept of objectivity to guide scientific pursuits and subsequently established rights which undermine the possibility of ever coming close to attaining the goal of being objective rights which entitle participating scientists to gain personal tangible profits from scientific discoveries Formerly we envisaged gods who kept us in place who reminded us that we were not all powerful or especially wise Now we tend to worship our achievements

especially our technological ones and ourselves Mary Midgley aptly names this phenomenon humanolatry We have lost our respect for nature in our enthusiasm for changing it to that which suits our shortsighted ends We must as she says unlearn this way of thinking

Clinician's Handbook of Preventive Services, 1998 **Cardiovascular Risk Management** Richard Hobbs, Bruce Arroll, 2009-01-26 Practical ABC style Enables doctors to prioritise treatment using risk scoring systems and holistic recommendations for reducing cardiovascular risk Includes treatment plans for individuals with diabetes who are at high risk of developing cardiovascular disease How to reduce cardiovascular risk in other specific patient groups Developed by expert groups in different regions of the world

Manual of Heart Failure Management Harikrishnan S, 2021-11-02 Heart failure is a serious condition caused by the heart failing to pump enough blood around the body at the right pressure It usually occurs because the heart muscle has become too weak or stiff to work properly most commonly caused by heart attack high blood pressure or cardiomyopathy heart disease This book is a comprehensive guide to the diagnosis and management of heart failure Divided into 81 sections the book begins with an overview of heart failure its epidemiology types assessment and diagnosis and imaging Each of the following chapters provides in depth detail on a different type or cause of heart failure concluding with discussion on intravenous drug administration With more than 100 contributors the text is further enhanced by charts and tables making it an excellent quick reference guide for both practising cardiologists and trainees Key points Comprehensive guide to diagnosis and management of heart failure Covers numerous different types and causes More than 100 expert contributors Highly illustrated with charts and tables
