Air Mobility Christop C. Cheng, 1994-04-21 In the immediate post World War II period Army aviation began to evolve from an observatory role to a mobility role Helicopter air mobility began to develop in the Army from 1949 onwards The outbreak of the Korean war assisted and accelerated the acceptance of greater helicopter air mobility within the Army The Eisenhower period was a golden age for Army aviation with rapid and extensive developments in air mobility doctrine and tactics There was also a strong research and development effort to overcome the initial technological lag These developments allowed the formation of the first air mobile division in 1965 to meet the growing demands of the Vietnam war This work gives a new understanding of the process of military innovation Moreover this case study has important general implications for future military policy making

Design Cybernetics Thomas Fischer, Christiane M. Herr, 2019-07-30 Design Cybernetics Navigating the New Design cybernetics offers a way of looking at ourselves curious creative and ethical humans as self organising systems that

negotiate their own goals in open ended explorations of the previously unknown It is a theory of and for epistemic practices learning designing researching that is deeply committed to the autonomy of others and hence offers no prescriptive methodology Design cybernetics describes design practice as inextricable from conversation a way of enquiring developing shared understanding and reaching the new that harnesses reliable control as well as error and serendipity Recognising circular causality observer dependency and non determinability design cybernetics extends beyond tenets of scientific research into the creative ethical and aesthetic domain From this perspective design is not an ill conceived subset of scientific research Instead scientific research emerges as a particularly restricted subset of the broader human activity of design This volume offers a cross section of design cybernetic theory and practice with contributions ranging across architecture interior lighting studies product design embedded systems design pedagogy design theory social transformation design research epistemology art and poetics as well as theatre and acting Addressing designers design educators and researchers interested in a rigorous practice based epistemology it establishes design cybernetics as a foundational perspective of design research This is a conceptually elegant well structured and comprehensive presentation of design cybernetics It fills a gap in the literature of the field Ken Friedman Chair Professor Tongji University This book offers a valuable and timely introduction to second order cybernetics as society grapples with complex issues like climate change and rising inequality Joichi Ito Director of the MIT Media Lab
