

1-1 Lesson Reading Guide

Expressions and Formulas

Get Ready for the Lesson

Read the introduction to Lesson 1-1 in your textbook.

- Nurses use the formula $F = \frac{V \times d}{t}$ to control the flow rate for IVs. Name the quantity that each of the variables in this formula represents and the units in which each is measured.

F represents the _____ and is measured in _____ per minute.

V represents the _____ of solution and is measured in _____.

d represents the _____ and is measured in _____ per milliliter.

t represents _____ and is measured in _____.

- Write the expression that a nurse would use to calculate the flow rate of an IV if a doctor orders 1350 milliliters of IV saline to be given over 8 hours, with a drop factor of 20 drops per milliliter. Do not find the value of this expression.

Read the Lesson

- There is a customary order for grouping symbols. Brackets are used outside of parentheses. Braces are used outside of brackets. Identify the innermost expression(s) in each of the following expressions.
 - $[(3 - 2^2) + 8] \div 4$
 - $9 - [5(8 - 6) + 2(10 + 7)]$
 - $(14 - [8 + (3 - 12)^2]) \div (6^2 - 100)$
- Read the following instructions. Then use grouping symbols to show how the instructions can be put in the form of a mathematical expression.
Multiply the difference of 13 and 5 by the sum of 9 and 21. Add the result to 10. Then divide what you get by 2.
- Why is it important for everyone to use the same order of operations for evaluating expressions?

Remember What You learned

- Think of a phrase or sentence to help you remember the order of operations.

Eye of the Heart William F. Sullivan, 2005-01-01 What is the role of feelings in the euthanasia debate This is the central question in William F Sullivan's unique philosophical and ethical exploration of the issue Eye of the Heart Employing the principles and techniques of the great Canadian theologian and thinker Bernard Lonergan Sullivan offers a concrete examination of the role of feelings in grasping moral values and the key role that feelings play in ethical decision making The heart has its reasons he argues convincingly and it is a type of

reason that bioethicists philosophers and legal scholars all need to know Sullivan draws on his experiences as a practicing physician to analyse the distinguishing elements of human knowing illustrating them through common examples of decision making in health care He highlights the occurrence of various types of insight particularly deliberative insights that occur in the process of making value judgments These deliberative insights are affective and through them a person apprehends moral values Eye of the Heart proposes that feelings are relevant to knowing moral values and orient us towards moral self transcendence The implications of this stance in ethics are drawn out for the euthanasia debate **NRI Journal** ,1958
