

Osteichthyes Packet

Lab

Presentation

Cornell Notes

Being fishes, skates inhabit every body of water. They are found in tropical, temperate, and polar seas, as well as virtually all fresh water environments.

Some species of *Scyris* follow us as dogs do (11 km (6.8 mi.) in the study area). Other species exhibit more dog-like behavior (2 km (1.2 mi.) within the study area).

About 50% of all species of bony fishes (more than 15,000 species) live in marine environments. Although only 0.01% of the earth's water is fresh water, freshwater fishes make up about 8% of fish species (more than 8,000 species).
