Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were randomly assigned to a control group (CON) and an exercise group (EX). The EX group performed a 12-week training program consisting of three sessions per week. The HR and HRR were measured at rest and during submaximal and maximal exercise at baseline and after 12 weeks. The EX group showed a significant decrease in HR at rest and during submaximal and maximal exercise compared to the CON group. The HRR also showed a significant increase in the EX group compared to the CON group. The results of this study suggest that a 12-week training program can improve the cardiovascular fitness of sedentary middle-aged men.

If the contribution margin is C , then the contribution margin ratio is C/T (expressed as a decimal). And, the contribution margin ratio is $C/T = (T - \text{fixed costs})/T$, and we can rearrange the equation to get:

23. When configuring a multi-mount AFS, set `mountmnt` to your Netatun file: `mountmnt=/etc/netatun/`
24. If you're using the `afs` multi-mount method, add the following line to the `netatun` file: `afs=/etc/netatun/`. In this scenario, a Netatun rule will be applied to the network interface that is configured. This means you'll either be purchasing this type of multi-mount AFS, or pointing out the group you wish to assign it.
25. Do not include the `afs` of `mountmnt` in the `afs` configuration.
26. When configuring the `afs` multi-mount AFS, you can choose to use the `afs` or `afs` Netatun file.

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light or natural light at night. To reduce the risk of circadian rhythm disruption, it is recommended that the amount of artificial light be reduced to the lowest level possible.
- Artificial lights that emit red light with a wavelength of 620 nm or longer are recommended, as the length of the spectrum may be reduced by filtering out the blue light spectrum.
- The use of natural light during the day may help to regulate the circadian rhythm. The presence of natural light during the day may help to regulate the circadian rhythm.
- Natural light is not recommended for the use of artificial light.

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers.
