SUBJECT: Cable card installation problem.

SYMPTOM: The OSD during the installation will show one of the following and cannot be completed.

1. On the Pairing Screen → "Information not available" will appear.
2. Invalid Cable Card error message (time).

DETAIL: The Samsung DLP looks for SST (System Time Table) to set the time automatically. If host and cable card tries to bind, but system time is still not set, the binding fails. (The certificates have valid time period and the host must check if the current time is within the valid time range.) Most cases, STT comes pretty frequently, so usually there is no problem with cable card installation even if the time setting is set to automatic. If STT does not come frequently, the installer may set time manually and finish cable card installation, then converts the time setting option to automatic.

REPAIR: The time and date need to be manually set before the cable card can be authorized.

PROCEDURE:

1. Eject the cable card.
2. Enter the customer menu to manually set the time and date. [MENU] → [SETUP] → [TIME]
3. Insert the cable card and proceed with pairing process.
