Communication Paul M. Pedersen, Pamela C. Laucella, Edward (Ted) M. Kian, Andrea N. Geurin, 2016-10-04 Strategic Sport Communication Second Edition explores the sport industry's exciting and multifaceted segment of sport communication. With communication theory, sport literature, and insight from the industry's leading professionals, the text presents a standard framework that introduces readers to the many ways in which individuals, media outlets, and sport organizations work to create, disseminate, and manage messages to their constituents. The team of international authors has drawn on its extensive practical, academic, and leadership experiences to update and revitalize this second edition of Strategic Sport Communication. Using the industry-defining standard of the Strategic Sport Communication Model (SSCM), the text explores sport communication in depth and then frames the three major components of the field: personal and organizational communication, sport media, and sport communication services and support. Readers will discover how each aspect of this segment of the sport industry is integral to the management, marketing, and operational goals at all levels of sport organizations. The second edition includes the following enhancements: A new expanded chapter titled Integrated Marketing Communication in Sport allows students to explore modern marketing strategy. Substantial updates and new information on multiple social media platforms throughout the book elucidate the latest trends. Sport Communication at Work sidebars and Profile of a Sport Communicator features apply topics and theoretical concepts to real-world situations. Key terms, learning objectives, and chapter wrap-ups with review questions, discussion questions, and individual exercises keep readers engaged and focused. An expanded ancillary package provides tools for instructors to use in course preparation and presentation. The content is complemented by photos throughout and organized in an easy-to-read style. Part I of the book introduces sport communication by defining the scope of study, examining roles and functions of sport communication professionals, and looking at the history and growth of the field. Part II dives into the SSCM, which provides a macro view of the three main components of communication in sport. This section also addresses digital and mobile communications, public relations, and crisis communication and sport research. Part III addresses sociocultural issues and legal aspects of sport communication, including culture, gender, sex, race, ethnicity, and politics. Throughout the text, individual exercises, group activities, review questions, and discussion questions promote comprehension for a variety of learning styles. With Strategic Sport Communication Second Edition, readers will be introduced to the vast and varied field of sport communication. The framework of the SSCM prepares readers with foundational and theoretical knowledge so they are able to understand the workings of and ultimately contribute to the rapidly growing field of sport communication.

expanding access to education made such limited progress on improving learning outcomes There is a growing recognition that the learning crisis constitutes a significant dimension of global inequality and also that educational outcomes in developing countries are shaped by political as well as socio economic and other factors The Politics of Education in Developing Countries focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries Bangladesh Cambodia Ghana Rwanda South Africa and Uganda The problem of education quality is serious across the Global South The Politics of Education in Developing Countries From Schooling to Learning deploys a new conceptual framework the domains of power approach to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes The domain of education is prone to being highly politicized as it offers an important source of both rents and legitimacy to political elites and can be central to paradigmatic elite ideas around nation building and modernity Of particular importance is the relative strength of coalitions pushing for access as against those focused on issues of higher quality education This book concludes with a discussion of entry points and strategies for thinking and working politically in relation to education quality reforms and critical commentaries
