Thomakos, Platon Monokroussos, Konstantinos I. Nikolopoulos, 2016-03-31 The recent financial crisis has generated many structural changes within the economy. Many issues are ongoing and the question of how to recover from the crisis and how to avoid another one are continually addressed by scholars and practitioners everywhere. Where there is much discussion within academic and practitioner circles, there is not always adequate interaction between these schools of research. This book provides a thorough overview of the recent financial crisis from the perspective of both industry practitioners and academics specialising in the area. The first part provides practitioner insight on the crisis and explores the causes and effects and of the recession. European public financing, ECB monetary policy and the Euro, the repression of financial markets and financial stability. Part two focuses on the case of Greece as a country still heavily impacted by the crisis which has undergone various unorthodox policies imposed by the IMF, the ECB, the EU. The third part provides insight from researchers and academics covering an array of Economic theories and revealing new economics architectures available for the future. With informed views from both financial industry practitioners and academics, this book discusses current issues and implementable solutions for a faster post crisis recovery.     *TURKISH ECONOMIC ASSOCIATION INTERNATIONAL CONFERENCE ON ECONOMICS ICE-TEA 2018* Ercan Uygur, Huseyin Karamelikli, 2018-12-31     **Playing with Fire** Yilmaz Akyüz, 2017 Many emerging and developing economies (EDEs) have liberalised their capital accounts, allowing greater freedom for international lenders and investors to enter their markets. Otsuka, 2023-05-28 How to Pool Risks across Generations makes the case for the collective provision of pensions on fair terms of social cooperation Through the insurance of a mutual association which extends across society and over multiple generations we share one another's fates by pooling risks across both space and time Resources are transferred not simply between different people but also within the possible future lives of each person from one's more fortunate to one's less fortunate future selves The book opens with an investigation of the longevity and investment risk that even a single individual on a desert island would face in providing for her old age From this atomistic starting point it builds up within and across the chapters to increasingly collective forms of pension provision By joining together it is possible to tame the risks we would face as individuals each with our own private pension pot A collective pension can be justified as a social union of social unions an enduring corporate body which is formed by agreements to pool risks in a manner that involves reciprocity between the various individuals that constitute the collective Even though all individuals age and die a collective pension scheme remains evergreen as the average age of members remains relatively unchanged through the influx of new members to replace those who retire It is therefore possible to smooth risks indefinitely across as well as within generations to the mutual advantage of each      *OECD/G20 Base Erosion and Profit Shifting Project Measuring and Monitoring BEPS, Action*

**On Unemployment** Mark R. Reiff, 2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book s various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology
