Although the focus of the text is the intervention process, *Occupational Therapy Interventions Functions and Occupations Second Edition* also includes a detailed Evaluation Grid which offers a unique approach to choosing occupational therapy evaluations. New in the Second Edition, new evidence based articles have been added to each of the chapters. Some new, rewritten and expanded chapters. Updated references throughout. Documenting Occupation-based Interventions to Promote

Occupational Therapy's Distinct Value Rachel A. Roberts, 2017. The ability to clearly articulate the distinct contribution of occupational therapy across practice settings is essential for promoting the value of the occupational therapy profession. Challenges to documenting occupation based interventions have been identified by practitioners working in medically dominated contexts. Clear articulation of services results from a thorough understanding of the theoretical views, models of practice and frames of reference guiding the occupational therapy profession. Treatment provision that is grounded in occupation based theories, models of practice and frames of reference can facilitate the production of quality documentation. This evidence based project serves to inform entry level occupational therapy educators on the challenges practitioners experience when documenting occupation based interventions. Recognizing and understanding identified challenges can lead to the development of effective teaching strategies that promote student articulation of occupation based interventions while utilizing the profession's distinct language and core concepts of occupation.
