Rasch, 2018-05-15 Having information is key for most political decisions both for decision makers and societal actors This is especially crucial in democratic countries where external stakeholders are invited to participate in decision making processes Assuming that every actor that gets involved in decision making processes has a particular lobbying goal there is a heterogeneous set of actors competing against each other to provide information to the decision makers This competition leads some stakeholders to be more successful in achieving their goals than others Frames and the framing of information play an important role in such lobbying success In this book Daniel Rasch questions whether and if so how information impacts lobbying success and shows how various actors perform in three instances of European decision making He does so by combining findings from a qualitative content analysis with the results of a cross case analysis using the quantified qualitative data The new dataset contains a representative sample of over 200 position papers from EU level and national consultations press releases and evidence from national stakeholders in Germany Sweden and the United Kingdom Lobbying Success in the European Union effectively bridges research on interest mediation and framing studies and offers a new model for measuring stakeholders success This new and pragmatic approach to study lobbying success using a traceable and easy to use instrument can be adapted to any policy analysis and any issue **Congo Stories** John Prendergast, Fidel

**Congressional Record** United States. Congress,2012 Library Technical Services Stacey Marien,2020-08-15

Libraries are experiencing major changes concerning the role of technical services. Technical services librarians also are being challenged about their relevance and role, sometimes revealed by a lack of understanding of the contribution technical services librarians make to building and curating library and archival collections. The threats are real: relocation from central facilities, the dramatic shift to electronic resources, budgetary constraints, and outsourced processing. As a result, technical services departments are reinventing themselves to respond to these and similar challenges while embracing innovative methods and opportunities to advance librarianship in the twenty-first century. *Library Technical Services* provides case studies that highlight difficult realities yet embrace exciting opportunities such as space reclamation, evolving vendor partnerships, metadata retraining, and managing personnel, special collections, and distance education. Written for catalog and metadata librarians and managers of technical services units, this book will inspire and provide practical advice and examples for solving issues many libraries are facing today.

*Atlas of Knowledge* Katy Borner, 2015-03-20 The power of mapping principles for visualizing knowledge illustrated by many stunning large-scale full-color maps. Maps of physical spaces locate us in the world and help us navigate unfamiliar routes. Maps of topical spaces help us visualize the extent and structure of our collective knowledge; they reveal bursts of activity, pathways of ideas, and borders that beg to be crossed. This book from the author of *Atlas of Science* describes the power of topical maps, providing readers with principles for visualizing knowledge and offering as examples forty large-scale and more than 100 small-scale full-color maps. Today, data literacy is becoming as important as language literacy. Well-designed visualizations can rescue us from a sea of data, helping us to make sense of information, connect ideas, and make better decisions in real time. In *Atlas of Knowledge*, leading visualization expert Katy Borner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis. Drawing on fifteen years of teaching and tool development, she introduces a theoretical framework meant to guide readers through user and task analysis, data preparation, analysis, and visualization, visualization deployment, and the interpretation of science maps. To exemplify the framework, the *Atlas* features striking and enlightening new maps from the popular *Places Spaces Mapping Science* exhibit that range from Key Events in the Development of the Video Tape Recorder to Mobile Landscapes, Location Data from Cell Phones for Urban Analysis, to Literary Empires, Mapping Temporal and Spatial Settings of Victorian Poetry, to Seeing Standards: A Visualization of the Metadata Universe. She also discusses the possible effect of science maps on the practice of science.
