*The Violinist's Thumb* Sam Kean, 2012-07-17 From New York Times bestselling author Sam Kean comes incredible stories of science history language and music as told by our own DNA In *The Disappearing Spoon* bestselling author Sam Kean unlocked the mysteries of the periodic table In *The Violinist's Thumb* he explores the wonders of the magical building block of life DNA There are genes to explain crazy cat ladies why other people have no fingerprints and why some people survive nuclear bombs Genes illuminate everything from JFK's bronze skin it wasn't a tan to Einstein's genius They prove that Neanderthals and humans bred thousands of years more recently than any of us would feel comfortable thinking They can even allow some people because of the exceptional flexibility of their thumbs and fingers to become truly singular violinists Kean's vibrant storytelling once again makes science entertaining explaining human history and whimsy while showing how DNA will influence our species future

*30-Second Elements* Eric Scerri, 2013-08-01 When was radium discovered Who are Dmitri Mendeleev and Glenn T Seaborg Who discovered uranium's radioactivity Which element is useful for dating the age of Earth And why doesn't gold have a scientific name *30 Second Elements* presents you with the very foundations of chemical knowledge explaining concisely the 50 most significant chemical elements This book uses helpful glossaries and tables to fast track your knowledge of the other 68 elements and the relationships between all of them

*Blanks, Print, Space, and Void in English Renaissance Literature* Jonathan Sawday, 2023-06-20 *Blanks Print Space and Void in English Renaissance Literature* is an inquiry into the empty spaces encountered not just on the pages of printed books in c 1500 1700 but in Renaissance culture more generally The book argues that print culture in the sixteenth and seventeenth centuries helped to foster the modern idea of the gap where words texts images and ideas are constructed as missing lost withheld fragmented or perhaps never devised in the first place It re imagines how early modern people reacted not just to printed books and documents of many different kinds but also how the very idea of emptiness or absence began to be fashioned in a way which still surrounds us Jonathan Sawday leads the reader through the entire landscape of early modern print culture discussing topics such as space and silence the exploration of the vacuum the ways in which race and racial identity in early modern England were constructed by the language and technology of print blackness and whiteness together with lightness darkness and sightlessness cartography and emptiness the effect of typography on reading practices the social spaces of the page gendered surfaces hierarchies of information books of memory pages constructed as waste or vacant the genesis of blank forms and early modern bureaucracy the political and devotional spaces of printed books the impact of censorship and the problem posed by texts which lack endings or conclusions The book itself ends by dwelling on blank or empty pages as a sign of human mortality Sawday pays close attention to the writings of many of the familiar figures in English Renaissance literary culture Sidney Shakespeare Donne Jonson and Milton for example as well as introducing readers to a host of lesser known figures The book also discusses the work of numerous women writers from the period including Aphra Behn Ann Bradstreet
