COLLEGE PERSONAL STATEMENT ESSAY SAMPLE

I have always been fascinated by science and I have always been searching for the hidden meaning of things. The career I am about to follow is presumably due to a plastic toy microscope I received as gift when I was ten years old. I started wonder how arousing microbial life is, invisible to the human eye and somewhat comparable to stars: unattainable. When the time to select my career path has come, I had no doubts in applying for the biological sciences college.

The career of an undergraduate student is full of stimuli, especially when the passion fully matches with academic interests. I submerged in any subject finding interest even for philosophical ones such as bioethics. In particular for the debate behind some controversial genetic engineering applications. According with ethical guidelines, while respecting the human rights and biodiversity I decided to follow the genetic engineering master course.

In order to improve my open mind, I am about to be enrolled in an ERASMUS programme to complete the studies at ETH in Zurich, Switzerland. I am confident it will be a unique experience, I look forward to meet scientists and their job, I will face how be a researcher is for the very first time. When I will be back for the graduation I have to take a very important decision. I am aware how challenging science life can be and I will be applying for Ph.D. positions. I am sure I will be mature enough to make the right choice in terms of laboratory's topic and place. To my knowledge, the ETH in Zurich is one of the most prestigious research institute in Europe: the opportunity to join it will give me the wisdom to make the right career path selection.
