Biographical Life Course Research Ann Nilsen, 2023-12-13 This open access book explores an approach that connects individual and societal processes throughout history and shifting trends in sociological perspectives influenced by C Wright Mills theories of time and temporality. It traces its origins from American pragmatist thought and Chicago qualitative sociology in the early 20th century to the revival of biographical research in European and American sociology during the 1970s. The book shows empirical studies from this vibrant research approach can bridge methodological gaps between qualitative and quantitative biographical studies applicable to various topics like class gender ethnicity and intergenerational dimensions

Understanding Individual

Commitment to Collective Action Carlos Ramírez,2023-09-01 When speaking colloquially of political participation or civic action one thinks in the first instance of groups and organizations such as political parties social movements or various types of voluntary associations The perspective of individuals is not the first thing that comes to mind when seeking to understand their functioning In contrast to this vision understanding the dynamics of participation requires taking a closer look at the individual that is at his or her moral dispositions and projects his or her multiple and simultaneous identities the breaking points in his or her biographical trajectory the roles he or she adopts in an organization or the styles of communication which he or she uses The book comprises a variety of case studies and theoretical and methodological contributions that independent of rational choice theories seek to understand collective action at the level of the individual and in doing so to articulate the various fields of study in this regard with the singularity of biographies and the reflective personal identities that characterize contemporary individualism
