Plumb,2018-02-21 *Plumb's Veterinary Drug Handbook* Ninth Edition updates the most complete detailed and trusted source of drug information relevant to veterinary medicine Provides a fully updated edition of the classic veterinary drug handbook with carefully curated dosages per indication for clear guidance on selecting a dose Features 16 new drugs Offers an authoritative complete reference for detailed information about animal medication Designed to be used every day in the fast paced veterinary setting Includes dosages for a wide range of species including dogs cats exotic animals and farm animals

Nutritional Cognitive Neuroscience Research at the Crossroads of Nutrition, Psychology, and Neuroscience Aron K. Barbey,Elizabeth J. Johnson,Margaret Joy Dauncey,2019-01-23 Nutritional Cognitive Neuroscience is an emerging interdisciplinary field of research that seeks to understand nutrition's impact on human cognition and brain health across the life span Research in this burgeoning field demonstrates that many aspects of nutrition from entire diets to specific nutrients affect brain structure and function and therefore have profound implications for understanding the nature of psychological health aging and disease The aim of this Research Topic in *Frontiers in Aging Neuroscience* is to examine recent empirical and theoretical contributions from Nutritional Cognitive Neuroscience with an emphasis on the following primary areas of inquiry Nutrition and Brain Health An enduring aim of research in the nutritional sciences is to discover specific nutrients and dietary patterns that enhance cognitive function and brain health in the elderly Although an abundance of evidence supports a single or a few nutrients for the promotion of cognitive performance and brain health clinical trials using nutritional supplementation have been predominately unsuccessful Further research is therefore needed to better characterize the contributions of specific nutrients and nutrient combinations to cognitive performance and brain health Moderators of Nutrition's Impact on the Brain A second major area of research in Nutritional Cognitive Neuroscience investigates the mechanisms that underlie the effects of nutrition on brain health at the cellular molecular and circuit levels Accumulating evidence indicates that the effects of nutrition on brain health are complex and multifactorial reflecting the influence of particular nutrient combinations on specific brain networks and taking into account several moderating factors Considerably more research is needed to elucidate the complex interactions between nutrition and known moderating variables including age nutritional status genes environment and lifestyle in determining nutrition's impact on cognitive

function and brain health Personalized Nutrition Research at the frontiers of Nutritional Cognitive Neuroscience establishes a personalized approach to nutritional intervention that takes into account individual variability in nutritional status brain health genes environment and lifestyle The goal of personalized nutrition is to enhance the precision of nutritional intervention and to enable novel applications to psychological health aging and disease

Analysing Political Speeches

Jonathan Charteris-Black, 2018-08-24 Exploring speeches by public figures such as Emma Watson Tony Blair Donald Trump Julia Gillard and Lady Gaga this engaging textbook explains the ways in which political speeches can be analysed It examines the role of language in speeches and how it can be used to challenge or reinforce prevailing social cultural and political attitudes Each chapter introduces a particular discourse approach and then applies this in a model analysis of a passage of text The chosen texts concern issues of social cultural and political importance that address topics of significant importance to the audience to which they were delivered Students are encouraged to engage with the text and consider how approaches to text analysis such as cohesion context analysis and metaphor analysis may be adapted to provide a more critical perspective This text will be essential reading for students of English language linguistics communication studies and politics on critical discourse and discourse analysis modules

Biological Mechanism-Based and Patient-Centered

Management of Cancer-Related Symptoms and Syndromes Antonio Macciò, Silvia Busquets, Clelia Madeddu, Josep M. Argilés, 2019-03-22 The lack of recovery prospects in advanced cancer patients has often led to neglect important achievable therapeutic objectives such as Quality of Life QL improvement aimed at preserving for as long as possible patient integration with their family and social environment In fact traditional antineoplastic therapy protocols have been for a long time designed to demonstrate an advantage in clinical response and survival but have ignored essential supportive therapies and psychological and social well being safeguard programs Recent research of early integrated palliative care including supportive care aimed to obtain patient centered therapeutic objectives Noteworthy advanced cancer patients often present a multiplicity of signs and symptoms responsible for physical impairment and reduction of functional abilities with consequent impossibility of carrying out the common daily activities Additionally the psycho emotional integrity the maintenance of family and social relationships and the spiritual issues contribute substantially to the optimal patients QL Then in the care of cancer patients their physical psychological social and spiritual needs should be globally addressed In this context cancer related symptoms which often occur in advanced stage cancer patients and can be either improved or worsened by the antineoplastic therapy should be treated simultaneously with the planning and implementation of the most appropriate antineoplastic therapy Therefore any therapeutic approach should ideally be introduced within a context of the best supportive care which includes optimal symptom management To obtain this scope the knowledge and awareness of the biological specificity of the disease and patient psychosocial interactions can no longer be considered optional by the multidisciplinary medical team in charge To date many of the mechanisms at the basis of the pathogenesis of many cancer

related symptoms are far from being fully understood Consequently an effective treatment is yet lacking and represent an unmet need in oncology clinical practice This Research Topic includes articles in the field of biochemical and molecular investigations physiological and clinical studies related to the pathogenesis and potential targeted approaches of some important cancer signs and symptoms We focused on cachexia anorexia muscle wasting osteopenia cancer related anemia physical inactivity and fatigue The Research Topic includes Original Research Review and Perspective articles

Resolution of Inflammation: Mechanisms, Mediators & Biomarkers Paola Patrignani, Bernhard Brüne, Dieter Steinhilber, 2022-02-01 **The SAGE Handbook of Social Media** Jean Burgess, Alice Marwick, Thomas Poell, 2017-11-20

The world is in the midst of a social media paradigm Once viewed as trivial and peripheral social media platforms like Twitter Facebook and WeChat have become an important part of the information and communication infrastructure of society They are bound up with business and politics as well as everyday life work and personal relationships This international Handbook addresses the most significant research themes methodological approaches and debates in the study of social media It contains substantial chapters written especially for this book by leading scholars from a range of disciplinary perspectives covering everything from computational social science to sexual self expression Part 1 Histories And Pre Histories Part 2 Approaches And Methods Part 3 Platforms Technologies And Business Models Part 4 Cultures And Practices Part 5 Social And Economic Domains **Intermediate Statistical Investigations** Nathan Tintle, Beth L. Chance, Karen McGaughey, Soma Roy, Todd Swanson, Jill VanderStoep, 2020-09-09

Intermediate Statistical Investigations provides a unified framework for explaining variation across study designs and variable types helping students increase their statistical literacy and appreciate the indispensable role of statistics in scientific research Requiring only a single introductory statistics course as a prerequisite the program uses the immersive simulation based inference approach for which the author team is known Students engage with various aspects of data collection and analysis using real examples and clear explanations designed to strengthen multivariable understanding and reinforce first course concepts Each chapter contains in depth exercises which follow a consistent six step statistical exploration and investigation method ask a research question design a study explore the data draw inferences formulate conclusions and look back and ahead enabling students to assess a variety of concepts in a single assignment Challenging questions based on research articles strengthen critical reading skills fully worked examples demonstrate essential concepts and methods and engaging visualizations illustrate key themes of explained variation End of chapter investigations use real data from popular culture and published research studies in a variety of disciplines exposing students to various applications of statistics in the real world Throughout the text user friendly Rossman Chance web applets allow students to conduct the simulations and analyses covered in the book **Fish and Fish Oil in Health and Disease Prevention** Susan Raatz, Douglas Bibus, 2016-07-21

Fish and Fish Oil in Health and Disease Prevention provides an authoritative review of the role of fish and fish oil intake in the promotion of human health This up to date volume provides a

complete examination of intake patterns as well as research evidence of intake in disease prevention and treatment Readers will gain knowledge ranging from the current state of fish and fish oil intake their health promoting effects and influences on individual response how they influence development and health maintenance through the life cycle and their role in disease prevention and treatment This book is an invaluable resource for all researchers working to understand the relationship between fish and human health It is a valuable reference for nutritionists dietitians and health care providers Imparts a valuable understanding of fish intake patterns around the world and the role of fish and fish oil in human health through the lifecycle Offers an understanding of the role of fish and fish oil in disease risk reduction and treatment Presents the current status of fish intake and recommended intake levels for human health Focuses on research on unique fish and oil sources and potential problems with fish availability

Law and Power, 2023-12-28 In the Roman world landscapes became legal and institutional constructions being the core of social political religious and economic life The Romans developed ambitious urban transformations seeking to equate civic monumentality and legal status The built environment becomes the axis of the legal administrative sacred and economic system and the main element of dissemination of imperial ideology This volume follows the modern trend of a multifaceted composite multi layered Roman world but at the same time reduces its complexity It views Roman not only in the sense of power politics but also in a cultural context It highlights landscapes and puts into the shadow important administrative and legal structures i e individuals viz local and imperial members of the elites living in cities which ran the Roman world

Handbook of Meta-Analysis Christopher H. Schmid, Theo Stijnen, Ian White, 2020-09-07 Meta analysis is the application of statistics to combine results from multiple studies and draw appropriate inferences Its use and importance have exploded over the last 25 years as the need for a robust evidence base has become clear in many scientific areas including medicine and health social sciences education psychology ecology and economics Recent years have seen an explosion of methods for handling complexities in meta analysis including explained and unexplained heterogeneity between studies publication bias and sparse data At the same time meta analysis has been extended beyond simple two group comparisons of continuous and binary outcomes to comparing and ranking the outcomes from multiple groups to complex observational studies to assessing heterogeneity of effects and to survival and multivariate outcomes Many of these methods are statistically complex and are tailored to specific types of data Key features Rigorous coverage of the full range of current statistical methodology used in meta analysis Comprehensive coherent and unified overview of the statistical foundations behind meta analysis Detailed description of the primary methods for both univariate and multivariate data Computer code to reproduce examples in chapters Thorough review of the literature with thousands of references Applications to specific types of biomedical and social science data Supplementary website with code data sample chapters and errata This book is for a broad audience of graduate students researchers and practitioners interested in the theory and application of statistical methods for meta analysis It is written at the level of graduate courses in statistics but will be of

interest to and readable for quantitative scientists from a range of disciplines The book can be used as a graduate level textbook as a general reference for methods or as an introduction to specialized topics using state of the art methods

Methods of Critical Discourse Studies Ruth Wodak, Michael Meyer, 2015-10-15 This is a sophisticated and nuanced introduction to critical discourse analysis CDA that covers a range of topics in an accessible engaging style With international examples and an interdisciplinary approach readers gain a rich understanding of the many angles into critical discourse analysis the fundamentals of how analysis works and examples from written texts online data and images This new edition expands coverage of multimodality adds two new chapters on social media and analysis of online data supports learning with a guided introduction to each chapter includes a new and extended glossary Clearly written practical and rigorous in its approach this book is the ideal companion when embarking on research that focuses on discourse and meaning making

Endogenous and Exogenous Molecules Modulating Voltage-Gated Potassium Channels Damon

Frampton, 2024-10-02 The superfamily of voltage gated potassium KV channels is crucial for the normal function of several tissues and represents an attractive pharmacological target for treating disorders such as epilepsy and cardiac arrhythmias However any drug designed to target a KV channel must be capable of discriminating between different members within the superfamily lest they plague the user with deleterious side effects Such rational design requires structural and functional insight into how the selectivity of a molecule can be tailored to suit the intended target This thesis combines the use of electrophysiological and computational techniques to investigate the molecular basis for how the function of hKV7 and hERG channels can be modulated by different lipophilic compounds with known or suspected effects on ion channels These include polyunsaturated fatty acids PUFAs cannabidiol CBD and synthetic cannabinoid receptor agonists SCRA's Using the two electrode voltage clamp technique on *Xenopus* oocytes we find that both PUFAs and CBD modulate the function of hKV7 channels in subtype specific manners PUFAs facilitated the activation of hKV7 channels except for hKV7 4 channels which were instead inhibited Molecular dynamics simulations revealed that structural differences in the voltage sensing domain of hKV7 4 conferred a unique inhibitory PUFA interaction site absent in the other hKV7 subtypes Once this site was neutralised by mutagenesis PUFAs facilitated hKV7 4 activation In the case of CBD we observed three different responses inhibition of channels with hKV7 1 subunits potentiated voltage sensitivity of channels with hKV7 2 or hKV7 3 subunits and enhanced maximum conductance of channels with hKV7 4 or hKV7 5 subunits However these responses were evoked from the same interaction site in the pore domain indicating a more complex subtype specific mechanism of action Finally using an automated patch clamp system we screened 36 different SCRA's on the cardiac channels responsible for repolarisation hERG and hKV7 1 KCNE1 We find 28 of the SCRA's to be inhibitors of hERG and 22 to be inhibitors of hKV7 1 KCNE1 Molecular dynamics simulations suggest the increased susceptibility of hERG to SCRA mediated inhibition may be due to a unique central cavity site that is absent from the pore domain of hKV7 1 KCNE1 In conclusion structurally diverse lipophilic

molecules of endogenous and exogenous origins can interact with KV channels and influence their function by enhancing or interfering with functional domains In some instances structural differences in the channel protein can explain the discrepancies in pharmacology These findings have implications for both pharmacology informing rational drug design and toxicology identifying targets through which adverse effects may occur **Microbial Syntrophy-mediated**

Eco-enterprising Raghvendra Pratap Singh,Geetanjali Manchanda,Kaushik Bhattacharjee,Hovik Panosyan,2022-02-09

Microbial Syntrophy Mediated Eco enterprising summarizes and reviews possible microbial applications for eco industrial sustainability The book emphasizes a wide spectrum of experimental and theoretical contributions from eminent researchers in the field In 13 chapters there is a focus on the microbial intrusions for remediating sites by accumulated pesticides heavy metals polyaromatic hydrocarbons and other industrial effluents Moreover the potentiality and key mechanisms used by microorganisms for sustainable environmental management and their prospects are also considered in this new release The term syntrophy for nutritional interdependence is often used in microbiology to describe the symbiotic relationship between bacterial species Understanding such interactions can be of considerable interest when we come to manipulate microbes to our own benefit such as by disrupting pathogenic communities with antibiotics or by promoting efficiency in communities that produce energy or break down waste Summarizes and reviews possible microbial applications for eco industrial sustainability Includes a wide spectrum of experimental and theoretical contributions from eminent researchers in the field Focuses on microbial intrusions for remediating sites and other industrial effluents **Discourses of the Arab**

Revolutions in Media and Politics Stefanie Ullmann,2021-08-23 Drawing on approaches from critical discourse analysis corpus linguistics and cognitive linguistics this book critically examines metaphorical language used in global media coverage and political statements on the events of the Arab Spring The volume begins by summarising key events of the Arab Spring tracing the development of protests from Tunisia and Egypt to Libya and Syria as well as the wider impact on the region Ullmann builds on this foundation to lay out the theoretical frameworks to be applied to an extensive corpus of natural language and actual discourse highlighting Western Middle Eastern and North African perspectives which integrate theoretical work on metaphor blending theory and semantic prosodies Methodological considerations on corpus selection and different conceptualisations of politics and mass media generally and across countries are discussed with the final chapters outlining the overarching themes across metaphors in the corpus and how these metaphors were ultimately framed in the mass media and political landscape This book will be of particular interest to students and scholars interested in critical discourse analysis language and politics and corpus linguistics **How to Read Economic News** Henry Silke,Fergal

Quinn,Maria Rieder,2023-08-31 Closely examining how the news media reports economic and financial matters this book equips students with solid methodological skills for reading and interpreting the news alongside a toolkit for best practice as an economic journalist How to Read Economic News combines theory and practice to explore the discourse surrounding

economics in the mass media and how this specialised form of reporting can be improved Beginning by introducing major concepts such as financialised economic reporting media amnesia and loss of trust the book goes on to help students to interpret understand and analyse existing news discourse and to identify subtle biases in news reports stemming from hegemonic belief systems The final section puts this analytical knowledge into practice providing students with methods for the critical production of news and covering such skills as identifying newsworthiness story sourcing achieving clarity and using complex datasets in news stories This is a key text for students and academics in the fields of financial journalism and critical discourse analysis who wish to approach the subject with a critical eye

Sensory Analysis for the Development of Meat Products José Manuel Lorenzo, Mirian Pateiro, Erick Saldana, Paulo E.S. Munekata, 2022-01-25 Sensory Analysis for the Development of Meat Products Methodological Aspects and Practical Applications highlights the application of sensory analysis in the development of meat products It presents the background and historical aspects of sensory evaluation on the characterization and development of meat products Divided into two sections the book discusses fundamental concepts methodological approaches statistical analysis innovative methods and presents case studies using these approaches Chapter include definitions applications literature reviews recent developments methods and end of chapter glossaries Researchers in sensory analysis and meat processing as well as new product developers will benefit from this comprehensive resource on the topics discussed Discusses the use of sensory analysis as a tool for the development of meat products Explores characterization quality processing new ingredients shelf life consumer studies and the health aspects of meat products with a special focus on sensory attributes Contains case studies that highlight sensory approaches and methods in the context of meat products

Contemporary Perspectives on Turkey's EU Accession Process Catherine MacMillan, 2018-10-19 Despite having made its first application for EEC membership in 1959 Turkey's bid to join the EU remains as controversial as ever with Turkey and EU relations arguably at an all time low in the aftermath of the attempted coup d'état of July 2016 In this context the essays here while using de Europeanisation as a broad theoretical framework explore the current state of Turkey's EU accession bid from a variety of perspectives including discourse analysis Euroscepticism and institutionalist approaches The essays focus not only on discursive and policy de Europeanisation within Turkey but also examine both official EU and European right wing Eurosceptic discourse on Turkish accession as well as approaching the Turkish accession process through comparisons with the contemporary Western Balkan countries and with post war Germany
