Malvasi, 2023-06-13 In this book the use of hybrid simulation in delivery room emergencies is described and shown. Furthermore, simulation with high reality computerized mannequin and scenography of emergency situation can improve technical and manual skills of the participants. For this book and the related videos, a new generation of mannequins suitable for both clinical manoeuvres and ultrasound examination is used to simulate all clinical scenarios of emergency that can happen in the delivery room for both the mother and the child. This unique book is a useful tool for medical students, residents, practicing pediatricians, anesthetists, obstetricians, and all health care professionals working in the delivery room in their ability to deal with critical and emergency situations with safety and good medical practice.
