

Ocean WebQuest Task Sheet

PLEASE REMEMBER TO WRITE IN COMPLETE SENTENCES EXCEPT FOR FILL-IN THE BLANK QUESTIONS.

<http://www.mos.org/oceans/motion/wind.html>

1. The size of a wave depends

On how far, how fast and how long the wind blows.

2. Waves travel through water, they do not take water with them.

<http://www.enchantedlearning.com/subjects/ocean/Waves.shtml>

3. Tsunamis are sometimes called tidal waves, and are different from surface waves: they are usually caused by underwater earthquakes, volcanic eruptions, or landslides.

<http://www.mos.org/oceans/motion/currents.html>

4. What do you call the circular patterns in which the world's oceans travel?
Currents.

5. What body of water can these patterns be compared to? Oceans

6. What else causes currents to flow? The Sun

7. Do all currents have the same characteristics? No

8. What makes them different? Salinity, Density, and Temperature

9. Describe the Gulf Stream by its characteristics. Warm, salty current up to 37 miles wide, 2600 feet deep, and in some places it travels up to 60 miles a day.

10. Besides cold water what does the Humboldt Current normally bring to the surface?
Minerals and other nutrients

<http://www.secretsofseas.org/story/3a.html>

11. For what are currents responsible? Actual transport of water from one place to another.

12. Major ocean currents maintain their paths like rivers.

<http://www.enchantedlearning.com/subjects/ocean/Tides.shtml>

13. Give a definition of tides and explain how what causes them. Tides are periodic rises and falls of large bodies of water. Tides are caused by the gravitational interaction between the Earth and the Moon. The gravitational attraction of the moon causes the oceans to bulge out in the direction of the moon. Another bulge occurs on the opposite side, since the Earth is also being pulled toward the moon (and away from the water on the far side). Since the earth is rotating while this is happening, two tides occur each day.

<http://oncampus.richmond.edu/academics/education/projects/webunits/cycles/index.html>

14. Tides are created because the Earth and the moon are attracted to each other, just like magnets are attracted to each other. The moon tries to pull at anything on the Earth to bring it closer. But, the Earth is able to hold onto everything except the water. Since the water is always moving, the Earth cannot hold onto it, and the moon is able to pull

Ocean Web Quest Task Sheet Answers:

Empowering Young Voices for the Planet Lynne Cherry, Juliana Texley, Suzanne Lyons, 2014-03-20 With the inclusion of climate change in the NGSS the time is ripe for a program that guides students to not only learn about but also engage in environmental activism This guide to getting youth involved in energy management fills that need Young Voices for the Planet started out as a film series featuring students who are actively trying to shrink the carbon footprint of their schools homes and communities This companion to that film series includes inspiring stories of youth in action and a guide to practical student activism Part I contains the true stories of seven youth projects allowing you to follow their paths to success The films all of which can be accessed free of charge supplement this part of the text by providing an introduction to climate science and energy curriculum for upper elementary through high school These powerful stories can be integrated into lessons on STEM Social Studies and Environmental Studies They will also help to teach about democracy and civic engagement Part II is a practical action guide to begin a project that is important to students own communities Whether the project is integrated into the regular curriculum structured for enrichment or remediation or organized under the auspices of a club or community effort educators will find many practical tips for success Think globally act locally isn't just a bumper sticker It's the game plan for exciting and powerful student activism This section describes how in school or after school groups can begin their own efforts to save the planet including the nitty gritty details on planning financing safety and liability

Ocean Country Liz Cunningham, 2015-09-08 Ocean Country is an adventure story a call to action and a poetic meditation on the state of the seas But most importantly it is the story of finding true hope in the midst of one of the greatest crises to face humankind the rapidly degrading state of our environment After a near drowning accident in which she was temporarily paralyzed Liz Cunningham crisscrosses the globe in an effort to understand the threats to our dazzling but endangered oceans This intimate account charts her thrilling journey through unexpected encounters with conservationists fishermen sea nomads and scientists in the Mediterranean Sulawesi the Turks and Caicos Islands and Papua New Guinea

NASA Tech Briefs, 1996 **Ocean Challenge**, 2004 *The Quest for Sustainable International Fisheries* Evelyn Meltzer, Susanna Fuller, 2009 A publication of the National Research Council of Canada Monograph Publishing Program

National Oceanic and Atmospheric Administration budget, fiscal year 1989 United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Oceanography, 1988 *Alien Ocean* Stefan Helmreich, 2023-09-01 Alien Ocean immerses readers in worlds being newly explored by marine biologists worlds usually out of sight and reach the deep sea the microscopic realm and oceans beyond national boundaries Working alongside scientists at sea and in labs in Monterey Bay Hawaii i the Woods Hole Oceanographic Institution and the Sargasso Sea and at undersea volcanoes in the eastern Pacific Stefan Helmreich charts how revolutions in genomics bioinformatics and remote sensing have pressed marine biologists to see the sea as animated by its smallest inhabitants marine microbes Thriving in astonishingly extreme conditions

such microbes have become key figures in scientific and public debates about the origin of life climate change biotechnology and even the possibility of life on other worlds Alien Ocean immerses readers in worlds being newly explored by marine biologists worlds usually out of sight and reach the deep sea the microscopic realm and oceans beyond national boundaries Working alongside scientists at sea and in labs in [Bridge to Reading Zone Teacher's Resource Guide](#) ,2013-03-01 Perfect for small group instruction geared toward Response to Intervention BTR Zone Bridge to Reading motivates reluctant and struggling readers with high interest nonfiction focused on science adventure biography history and sports With scaffolds such as on page definitions photographs illustrations captions subheads and informational graphics BTR Zone books provide practice with the text features so important to understanding informational text A teaching plan steeped in Common Core State Standards for Literacy provides instruction for vocabulary fluency comprehension and authentic writing truly providing a bridge for students to become more strategic readers [Congressional Record](#) United States. Congress,1999 **Impact!** Gerrit L. Verschuur,1997-12-18 Most scientists now agree that some sixty five million years ago an immense comet slammed into the Yucatan detonating a blast twenty million times more powerful than the largest hydrogen bomb punching a hole ten miles deep in the earth Trillions of tons of rock were vaporized and launched into the atmosphere For a thousand miles in all directions vegetation burst into flames There were tremendous blast waves searing winds showers of molten matter from the sky earthquakes and a terrible darkness that cut out sunlight for a year enveloping the planet in freezing cold Thousands of species of plants and animals were obliterated including the dinosaurs some of which may have become extinct in a matter of hours In Impact Gerrit L Verschuur offers an eye opening look at such catastrophic collisions with our planet Perhaps more important he paints an unsettling portrait of the possibility of new collisions with earth exploring potential threats to our planet and describing what scientists are doing right now to prepare for this awful possibility Every day something from space hits our planet Verschuur reveals In fact about 10 000 tons of space debris fall to earth every year mostly in meteoric form The author recounts spectacular recent sightings such as over Allende Mexico in 1969 when a fireball showered the region with four tons of fragments and the twenty six pound meteor that went through the trunk of a red Chevy Malibu in Peekskill New York in 1992 the meteor was subsequently sold for 69 000 and the car itself fetched 10 000 But meteors are not the greatest threat to life on earth the author points out The major threats are asteroids and comets The reader discovers that astronomers have located some 350 NEAs Near Earth Asteroids objects whose orbits cross the orbit of the earth the largest of which are 1627 Ivar 6 kilometers wide and 1580 Betula 8 kilometers Indeed we learn that in 1989 a bus sized asteroid called Asclepius missed our planet by 650 000 kilometers a mere six hours and that in 1994 a sixty foot object passed within 180 000 kilometers half the distance to the moon Comets of course are even more deadly Verschuur provides a gripping description of the small comet that exploded in the atmosphere above the Tunguska River valley in Siberia in 1908 in a blinding flash visible for several thousand miles every tree within sixty miles of ground zero was flattened He discusses

Comet Swift Tuttle the most dangerous object in the solar system a comet far larger than the one that killed off the dinosaurs due to pass through earth's orbit in the year 2126 And he recounts the collision of Comet Shoemaker Levy 9 with Jupiter in 1994 as some twenty cometary fragments struck the giant planet over the course of several days casting titanic plumes out into space when Fragment G hit it outshone the planet on the infrared band and left a dark area at the impact site larger than the Great Red Spot In addition the author describes the efforts of Spacewatch and other groups to locate NEAs and evaluates the idea that comet and asteroid impacts have been an underrated factor in the evolution of life on earth Astronomer Herbert Howe observed in 1897 While there are not definite data to reason from it is believed that an encounter with the nucleus of one of the largest comets is not to be desired As Verschuur shows in Impact we now have substantial data with which to support Howe's tongue in cheek remark Whether discussing monumental tsunamis or the innumerable comets in the Solar System this book will enthrall anyone curious about outer space remarkable natural phenomenon or the future of the planet earth Body Factory Kaitlin Pericak,2025-01-10 This book provides an ethnography of an athletic training center in the athletics department of an NCAA Division I University in the United States The author argues that the organizational orientation towards profit leads staff to use social structures to promote control and surveillance over individual care or empowerment Collier's,1916 Newsletter - IAMSLIC. International Association of Marine Science Libraries and Information Centers, **Universalist Union**,1838 **I Am a Part of Infinity** Kieran Fox,2025-04-01 A beautifully written David Fideler spiritual biography of Albert Einstein that reveals for the first time the scientific and religious origins of his personal philosophy a must read for anyone who wants to understand the mind of the great physicist Jo Marchant Albert Einstein remains renowned around the world for revolutionizing our understanding of the cosmos but very few realize that the celebrated scientist had a deep spiritual side Einstein believed that one wondrous force was woven through all things everywhere and this sense of the pervasive sacred influenced every aspect of his existence from his marvelous science to his passionate pacifism I Am a Part of Infinity offers the first in depth exploration of Einstein's spirituality showing how he drew on a dazzling diversity of thinkers from Pythagoras to Plato Schopenhauer to Spinoza the Upanishads to Mahatma Gandhi to create a novel system where mysticism met mathematics reality was revered and the human mind was honored as a mirror of the infinite This wasn't just a new way of seeing the world Einstein asked us to commune with the cosmos to treat every living creature with compassion to channel the power that permeated all things and put it to use for pure purposes Drawing on little known conversations recently published letters and new archival research I Am a Part of Infinity reveals what Einstein really believed and why his perspective still matters today **Jacaranda Humanities Alive 7 Victorian Curriculum, LearnON and Print** Robert Darlington,Judy Mraz,Graeme Smithies,Matthew Richardson,Ben Rood,Cathy Bedson,Anne Low,Simon Phelan,2019-11-13 Jacaranda Humanities Alive 7 Victorian Curriculum 2nd Edition learnON Print This combined print and digital title provides 100% coverage of the Victorian Curriculum for
