Sclafani RN MS M.Ed, 2020-01-03 If not for ourselves then for the future health of our children This book provides a bold overview of how the air we breathe the

water we drink and the food we eat are damaging our health in a very gradual and persistent manner Environmental toxins are all pervasive in our surroundings and are most likely related to the escalation of chronic diseases A listing of actual environmental toxins is focused upon as well as how these toxins gradually alter over time our physiology resulting in a serious threat to human health Documentation of toxic contamination is provided utilizing information published by federal agencies as well as scientific research investigative reports newspaper articles and recent EPA and toxic tort litigation efforts The book is self help in nature and focuses on actions individuals can take to protect their children as well as themselves from the devastating effects of our toxic environment **Library of Congress Subject Headings** Library of Congress,2013
