Hughes, 2020-08-15 The call for trauma informed education is growing as the profound impact trauma has

for the children's ability to learn in traditional classrooms is recognized. For children who have experienced abuse and neglect, their behavior is often highly reactive, aggressive, withdrawn, or unmotivated. They struggle to learn, to make positive relationships, or be influenced positively by teachers and school staff. Students become more and more at risk for mental health difficulties. Teachers become more and more frustrated and discouraged as they attempt to teach this vulnerable group of students. Even though it is relationships that have hurt students with developmental trauma, it is known that they must find safe relationships to learn and heal. Forming those relationships with children who have been hurt and no longer trust adults is not easy. This book focuses on three important and comprehensive areas of theory and research that provide a theoretical, clinical, and integrated intervention model for developing the relationships and felt sense of safety children with developmental trauma need. Using what is known from attachment theory, intersubjectivity theory, and interpersonal neurobiology, the reader is helped to understand why children behave in the challenging ways they do. This book offers successes and ongoing challenges as a means to continue the conversation about how best to support some of our most at risk youth.

The Handbook of Canadian Boarding Schools Ashley Thomson, 1999-09-01

Private schools have frequently provided innovative, experimental, and creative programs unavailable to students in the public system. The most successful have survived and expanded by offering an educational experience widely perceived to be not just as good as that available in the public system but better. In Canada, private schools are enjoying an unprecedented popularity, and while most are day only, over sixty sustain boarding programs, as do two off shore Canadian schools. The Handbook of Canadian Boarding Schools presents information on the educational environment of each province, then offers comparative information on each boarding school. The information on each school includes basic data, location, history, philosophy, the campus, boarding facilities, health and safety administration, and faculty, student body, and student conduct, academic calendar, and program information, technology, student activities, and student conduct, admission, and costs. The Handbook also supplies several appendices outlining important programs often available through boarding schools, such as Advanced Placement courses and the International Baccalaureate. For parents in Canada and abroad about to commit substantial sums to their children's education, the Handbook of Canadian Boarding Schools is an essential tool to help them make the right decision. It is also an indispensable resource for supporters of the public system looking for ideas that have worked elsewhere.
